Stephen Biesty's Incredible Cross Sections:

Stephen Biesty's Incredible Cross-Sections Stephen Biesty, 2019-05-14 This children's book explores the innermost workings of some extraordinary buildings and machines. From helicopters to submarines, skyscrapers to coal mines, open up a fascinating world packed with unique and detailed cutaway drawings. Whether it's a Spanish galleon or a medieval castle, each cross-section slice or exploded view reveals what's going on inside. See the people swarming inside the Empire State Building, the workers busy backstage at the opera house, and where the crew sleeps on a jumbo jet. Included also are two impressive foldouts showing an ocean liner and a steam train. There are lots of fun facts to be discovered and curious details are highlighted and explained. Did you know one of the funnels of the Queen Mary liner was fake and used for storing deckchairs? And in almost every scene, there's the challenge to find a man on the toilet. With more than a million copies sold, Stephen Biesty's award-winning illustrated book is as fascinating today as it was when first published in 1992. *Incredible Cross Sections* is the ultimate way to see how things work. *Stephen Biesty's incredible cross-sections, illus by Stephen Biesty*, 1992

Did you know that steam engines were notoriously difficult to stop, leading to frequent accidents? Or that people at an Antarctic research base rely on supplies from an aircraft's parachute drops during winter? His intricate artwork will have children and adults alike poring over every detail, whether it's following the production line of a factory making newspapers or exploring the insides of the Saturn V rocket. Platt,1992 This picture book shows readers what goes on inside 18 of the world's largest buildings and machines. Each illustration is based on the actual plans or architects' drawings so that readers know they are looking inside real structures, not a figment of some artist's imagination. Two of these illustrations are printed on fold-out pages which are a metre wide. Packed around the cross-sections are facts about each diagram which include a medieval castle, a galleon, a coal mine, helicopter, steam train, and space shuttle. **Stephen Biesty's Incredible Body Cross-Sections** Richard Platt,2020-08-25

How does the body protect itself from infections? What makes your tummy rumble? Are you taller at the beginning or end of the day? This extraordinary book actually takes you inside and around the human body to see how it works with the help of some truly unique illustrations and some very small people. Explore your brain, your bones, and everything in between in incredible cross-section drawings of all the body systems. Inside each one are teams of tiny characters busy at work and explaining what's going on. Every page is packed with jaw-dropping facts. Did you know that the skin is your largest organ in an adult? It's 2 sq m / 22 sq ft. Have you ever thought about how heavy the brain is? Well, it's about 1.4 kg / 3 lb and is crammed with 100 billion nerve cells that help you think and move. And by the time you turn 75, your heart will have pumped blood around your body 4,000 million times. With the challenge of finding two tiny explorers making their way through the body, learning about anatomy has never been so much fun. **Absolutely Best Cross-sections Book Ever** Richard Platt,1999

From the drawbridge to the dungeon, Cross Sections Castle swarms with the people who keep the castle going: the workers, craftsmen, and servants. And as you pore over every page, look out for the villainous spy. Is he in the well? The keep? The moat? No! Keep looking; he's there somewhere.
