Recent Advances in Material, Manufacturing, and Machine Learning Rajiv Gupta, Devendra Deshmukh, Awanikumar P. Patil, Naveen Kumar Shrivastava, Jayant Giri, R.B. Chadge, 2023-05-26 The role of manufacturing in a country's economy and societal development has long been established through their wealth-generating capabilities. To enhance and widen our knowledge of materials and to increase innovation and responsiveness to ever-increasing international needs, more in-depth studies of functionally graded materials, tailor-made materials, recent advancements in manufacturing processes, and new design philosophies are needed at present. The objective of this volume is to bring together experts from academic institutions, industries, and research organizations and professional engineers for sharing of knowledge, expertise, and experience in the emerging trends related to design, advanced materials processing, and characterization and advanced manufacturing processes.

New JIT, New Management Technology Principle Kakuro Amasaka, 2014-12-03

New JIT: New Management Technology Principle contains the previously published, updated, and new works of renowned scientist, scholar, and consultant Kakuro Amasaka. This book details the Just in Time (JIT) quality management strategy, exploring the cutting edge of a new management technology principle that surpasses what traditional JIT has accomplished. The new JIT principle contains hardware and software systems and next-generation technical principles for transforming management technology into management strategy. This comprehensive work covers traditional JIT innovation and evolution, the full new JIT, and its applications, along with case studies. It is clearly impossible to lead the next generation by merely maintaining the two Toyota management technology principles: Toyota Production System and Total Quality Management. To overcome this issue, it is essential to renovate not only TPS, which is the core principle of the production process, but also establish core principles for marketing, design, and development, production, and other departments. This book reassesses the way management technology was carried out in the manufacturing industry and establishes new JIT. This next-generation management technology model is the JIT system for not only manufacturing but also for customer relations, sales, and marketing, product planning, research, and development, R & D, product design, production engineering, logistics, procurement, and administration, and management for enhancing business process innovation and introduction of new concepts and procedures. The book focuses on the theory and application of strategic management technology through the application of new JIT, then demonstrates its effectiveness in a case study based on an advanced car manufacturer. Using this new model, you can realize manufacturing that places top priority on customers with a good Quality Cost and Delivery (QCD) in a rapidly changing technical environment and allows you to create uniform quality for the global market.
