Textile Tools Of Colonial Homes:

The Textile Tools of Colonial Homes Marion L. Channing, 1971 **The Textile Tools of Colonial Homes**, 1971 **A History Of Textiles** Kax Wilson, 2021-11-28 Originally published in 1979 this volume acts as a reference for the history of textiles. It asks questions on the effect of technology on textiles: how did particular historical periods and locations expand or limit the possibilities for the manufacture of fabrics and how the textile history related to politics and economics, sociology and psychology, art and engineering, anthropology and archaeology, chemistry and physics. Addressing these questions, the author surveys the development of the technical components of fabrics and discusses the textiles of selected places and times. She uses prose drawings and more than 130 photographs to show how each era of textile production reflects its age. This book is designed to serve as a college text and as a reference work for museum researchers. With sections including illustrations and diagrams, key terminology, spinning wool, spinning and raw materials, single ply and cord and fabric construction.

A Weaver's Garden Rita Buchanan, 2012-07-03 Valuable hints on dyeing fibers and fabrics, soap plants to use for cleaning textiles, fragrant plants to scent and protect fabrics, planning and creating a garden featuring cotton, flax, indigo and much more.

The Weaver's Craft Adrienne D. Hood, 2011-01-01 Cloth was one of the most important commodities in the early modern world and colonial North America. Americans had to develop creative strategies to acquire it. Although early European settlers came from societies in which hand textile production was central to the economy, local conditions in North America interacted with traditional craft structures to create new patterns of production and consumption. *The Weaver's Craft* examines the development of cloth manufacture in early Pennsylvania from its roots in seventeenth century Europe to the beginning of industrialization. Adrienne D Hood's focus on Pennsylvania and the long sweep of history yields a new understanding of the complexities of early American fabric production and the regional variations that led to distinct experiences of industrialization. Drawing on an extensive array of primary sources combined with a quantitative approach, the author argues that in contrast to New England, rural Pennsylvania women spun the yarn that a small group of trained male artisans wove into cloth on a commercial basis throughout the eighteenth century. Their production was considerably augmented by consumers purchasing cheap cloth from Europe and Asia, making them active participants in a global marketplace. Hood's painstaking research and numerous illustrations of textile equipment, swatch books and consumer goods will be of interest to both scholars and craftspeople.

Hedonizing Technologies Rachel P. Maines, 2009-08-01 Rachel P Maines's latest work examines the rise of hobbies and leisure activities in Western culture from antiquity to the present day. As technologies are hedonized, consumers find increasing pleasure in the hobbies associated with them. Tools, methods and instructional literature, work once essential to survival and comfort, gardening, hunting, cooking, needlework, home mechanics and brewing have gradually evolved into hobbies and recreational activities. As a result, the technologies associated with these pursuits have become less efficient but more appealing to the new class of leisure artisans.

Maines interprets the growth and economic significance of hobbies in terms of broad consumer demand for the technologies associated with them Hedonizing Technologies uses bibliometric and retail census data to show the growth in world markets for hobby craft tools books periodicals and materials from the late 18th century to today The book addresses basic issues in the history of labor and industry and makes an original contribution to the discussion of how technology and people interact
