From Meaning of Working to Meaningful Lives: The Challenges of Expanding Decent Work Annamaria Di Fabio,David L. Blustein,2016-09-21 This Research Topic explores issues that are central to the continued relevance of organizational and vocational psychology and equally central to the well being of individuals and communities

The cohering theme of this publication revolves around the question of how people can establish meaningful lives and meaningful work experiences in light of the many challenges that are reducing access to decent work. Another essential contextual factor that is explored in this volume is the Decent Work Agenda International Labour Organization 2008 which represents an initiative by the International Labour Organization. In this book we hope to enrich the Decent Work Agenda by infusing the knowledge and perspectives of psychology into contemporary discourses about work and well being. Another inspiration for this project emerged from the UNESCO Chair in Lifelong guidance and counseling recently established in Poland in 2013 under the leadership of Jean Guichard which has focused on advancing research and policy advocacy about decent work. This new era calls for an innovative perspective in constructing decent work and decent lives, the passage from the paradigm of motivation to the paradigm of meaning where the sustainability of the decent life project is anchored to a meaningful construction. During this period when work is changing so rapidly leaving people yearning for a sense of connection and meaning it is fundamental to create a framework for an explicitly psychological analysis of decent work.

The application of traditional educational concepts and approaches to the increasingly diverse contexts of foreign language education in the globalized world has created deep-seated tensions and challenges for Chinese universities. Research has previously examined

the relationship between teaching methods and student performance as well as the impact of globalization on foreign language pedagogy in China As part of the development of foreign language education a variety of educational settings have faced culturally specific challenges These challenges include the need to adapt to evolving technologies the changing needs of learners and the changing demands of the job market etc China s large population and diverse culture have necessitated the development of effective teaching methods and materials for foreign language instruction *Challenge* Joan
