A quick goggle of what happened to the contestants on the hit TV series *The Biggest Loser* should be enough to put you off this method. This show is a classic example of why moving more and eating less only works in the short term, if at all. There is a reason there are few reunion shows. So why are low calorie diets flawed? A study on 14 contestants on the *biggest loser* show revealed some alarming results six years after filming had finished. The initial results were impressive, but as the study showed, they were short-lived. Below are results of some of the factors tested: Weight: Average weight before filming 328 lb (148 kg), Average weight after 30 weeks on the show 199 lb (90 kg), Average weight six years after final 290 lb (131 kg). As you can see, contestants lost a massive amount of weight during filming, but struggled to maintain the weight loss over a long period of time. **Download Now!** To find out why the contestants couldn't keep the weight off and how to prevent it happening to you. **Intermittent Fasting for Beginners** Sandra Neel, 2023-12-15.
