Over the decades, there has been so much to say about leadership. From the economists to entrepreneurs and organizational researchers, leadership has always been the talk of the town. And all these discoveries and evolution have brought us all to a single platform of leadership. Now, experts and researchers have been finding out that there is no hard and fast rule of leadership, nor is there some sort of structure that goes along with all the organizational structures perfectly in sync. Leadership is a customized concept and it has to be plugged in smartly in order to make it effective. Effective leadership will only ensure that organizations perform like the giants in the industries of today and the future. But to achieve effective leadership, a leader has to unlearn the learned and enlighten themselves into learning the modern leadership styles, approaches, and action plans, and how their use in daily life can morph organizational compatibility and career success. Dive into this scintillating leadership guide which will help you understand how you have been doing it all wrong. It is time to change gears of leadership and make sure you are not just a LEADER, you are a SMART LEADER. Time to start your journey towards SMART LEADERSHIP. **Smart Leadership** Beth Caldwell, 2013-09-20. Today's leadership is about guiding a team, not being a boss.
