**Tasting** Rebecca Olien,2006 Explains the sense of taste and how the tongue works as a sense organ *Psychological Monographs* ,1909 Includes music **Perceptual Content** William G. Lycan,2024-03-13 Perceptual Content is the first book to discuss and compare the representational characters of all the traditional five senses It has three main topics or concerns 1 The diversity of the senses though Lycan maintains as a working assumption that all perception represents the similarity between sense modalities ends there The senses respective representational modes styles and structures not just their mechanisms differ very strongly from each other 2 The Layering thesis Lycan argues that a single sensory representation usually has more than one content the contents systematically related to each other by a priority or dependence relation More specifically a perceptual state may represent one object or property by representing a more primitive or less ambitious one he calls this the layering of content For example by hearing a sound sequence involving such and such volumes and timbres you hear a voice speaking and by hearing the voice you hear words in a language In some modalities layering works unexpectedly nearly all tactile representation derives from representation of conditions of or in the subject s own skin meaning that touch represents e g the texture of a physical object by and only by representing stress within the skin and even among the skin conditions some are represented only by representing more primitive ones 3 Aspect perception despite Wittgenstein s famous discussion of seeing as in a late section of Philosophical Investigations little has been written on perceiving as Besides its intrinsic interest even popular appeal what with joke ambiguous figures such as the duck rabbit and the old young woman it remains especially mysterious Nearly all work on it has concerned vision only But it is crucial for understanding auditory representation which is one thing that distinguishes hearing from the other senses Further the auditory case severely damages what Lycan and others had thought was the best approach to understanding aspect perception in terms of attention **Facts** ,1882 Studies from the Johns Hopkins Psychological Laboratory Johns Hopkins University Psychological Laboratory,1909 A Study in Memorising Various Materials by the Reconstruction Method Eleanor Acheson McCulloch Gamble,1909 The Encyclopedia Britannica ,1911 **Digest; Review of Reviews Incorporating Literary Digest** ,1929 **Beeton's Dictionary of practical recipes and every-day information** Samuel
