**The Making of a Dialogical Theory** Ivana Marková, 2023-07-06 Creating a stimulating social theory with long lasting influence for generations of scholars is driven by multiple interacting factors The fortune of a theory is determined not only by the author's creative mind but also by the ways in which principal concepts are understood and interpreted The proper understanding of a social theory requires a good grasp of major historical political and cultural challenges that contribute to its making Considering these issues Markov explores Serge Moscovici's theory of social representations and communication as a case study in the making of a dialogical social theory She analyses both the undeveloped features and the forward moving inspirational highlights of the theory and presents them as a resource for linking issues and problems from diverse domains and disciplines This dialogical approach has the potential to advance the dyad Self Other as an irreducible intellectual ethical and aesthetic unit in epistemologies of the human and social sciences

*The Smoky Dragon* Brandon Berntson, 2014-05-19 A new perception awoke behind my eyes I saw things as I never had viewed things with different eyes She spoke words without opening her mouth pacified every troubled thought She frolicked through me a playful dragon on a childhood playground laughing loving and crying inside me at the same time She danced with vapory stencils of my own mingling water with the scents of candy In a land of fantasy and wonder long after she is gone an old man refuses to let his

devotion die for his long lost sweetheart A story rich in color and philosophy Vibrant emotional and lyrical The Smoky Dragon is more than just a magical supernatural love story It is a lesson in life and love      **Probability in the Sciences E.**

Agazzi,2012-12-06 Probability has become one of the most characteristic concepts of modern culture and a probabilistic way of thinking may be said to have penetrated almost every sector of our intellectual life However it would be difficult to determine an explicit list of positive features to be proposed as identification marks of this way of thinking One would rather say that it is characterized by certain negative features i e by certain attitudes which appear to be the negation of well established traditional assumptions conceptual frameworks world outlooks and the like It is because of this opposition to tradition that the probabilistic approach is perceived as expressing a modern intellectual style As an example one could mention the widespread diffidence in philosophy with respect to self contained systems claiming to express apodictic truths instead of which much weaker pretensions are preferred that express probable interpretations of reality of history of man the hermeneutic trend An analogous example is represented by the interest devoted to the study of different patterns of argumentation dealing with reasonings which rely not so much on the truth of the premisses and stringent formal logic links but on a display of contextual conditions depending on the audience and on accepted standards judgements and values which render the premisses and the conclusions more probable the new rhetoric      *The Apocryphal New Testament* ,1926
