South Atlantic Seaway:

South Atlantic Seaway N. R. P. Bonsor, 1983 *British Mail Steamers to South America, 1851-1965* Robert E. Forrester, 2016-04-15 During the nineteenth century Britain's maritime commercial and colonial interests all depended upon a regular and reliable flow of seaborne information from around the globe Whilst the telegraph increasingly came to dominate long distance communication postal services by sea played a vital role in the network of information exchange particularly to the more distant locations Much importance was placed upon these services by the British government which provided large subsidies to a small number of commercial companies to operate them Concentrating initially on the mail service between Britain and South America this book explores the economic and political involvement of at the outset The Royal Mail Steam Packet Company later Royal Mail Lines from 1851 until 1874 The Company's West Indies services were subsidized from 1840 until the early years of the 20th century As well as providing a business history of the Royal Mail companies the book reveals much of the development of Brazil and Argentina as trading nations and the many and varied consequences of maintaining a long distance mail service Improved ship design led to larger vessels of greater cargo capacities essential to the growth of the lucrative and highly competitive import export trades between Britain and Europe and South America The provision of increased passenger services contributed to the very considerable British financial commercial and industrial interests in Latin America well into the 20th century The book also addresses the international competition faced by Royal Mail Lines which reflected Britain's progressively diminishing dominance of global trade and shipping In all this book has much to say that will interest not only business historians but all those seeking a better understating of Britain's maritime and economic history *New England and the St. Lawrence Seaway* Henry Ingraham Harriman, 1929 **Historical Biogeography of Neotropical Freshwater Fishes** James S. Albert, Roberto Reis, 2011-03-08 The fish faunas of continental South and Central America constitute one of the greatest concentrations of aquatic diversity on Earth consisting of about 10 percent of all living vertebrate species *Historical Biogeography of Neotropical Freshwater Fishes* explores the evolutionary origins of this unique ecosystem The chapters address central themes in the study of tropical biodiversity why is the Amazon basin home to so many distinct evolutionary lineages What roles do ecological specialization speciation and extinction play in the formation of regional assemblages How do dispersal barriers contribute to isolation and diversification Focusing on whole faunas rather than individual taxonomic groups this volume shows that the area's high regional diversity is not the result of recent diversification in lowland tropical rainforests Rather it is the product of species accumulating over tens of millions of years and across a continental arena *Fishing Vessel Construction* United States.
