Football Fitness and Conditioning Vladimir Vuksanovikj, 2023-11-07 This book is intended for those who want to work on improving the fitness and conditioning of football players. The contents are written above all for the needs of the fitness coaches, strength and conditioning performance coaches in football soccer, but the needs of the head and assistant coaches have also been covered. This book is a particularly useful tool for coaches working with young categories of football players. The principles for fitness and conditioning performance training are similar for different categories of players: professional adults, young players. The following contents, through examples and programmes, explain the principles of the processes of training and transformation of Human Motor Abilities (HMA) which are predominantly recognisable in the football game and which affect the improvement of the general and specific fitness of football players. For us as authors of this book, our goal is through these contents to enable the coaches to independently understand and set up transformation of Human Motor Abilities in the form of fitness and conditioning trainings. The trainings described are examples of good practice based on science. After reading the contents of this book, the coach should be able to develop one's own plan and programme for each kind of training. The future fitness and conditioning training plan should be a flexible plan and should follow the changes that occur in the players; it should be dynamic and adaptable according to the respective conditions. Topics covered: PRE SEASON PLAN TRANSFORMATION OF HUMAN MOTOR ABILITIES TRAINING LOAD DOSAGE MANAGEMENT FUNCTIONAL STRENGTH POWER TRAINING PERFORMANCE MONITORING OFF SEASON TRAININGS REHABILITATION INJURY PREVENTION **US 219 Between Springville to Salamanca, Improvements from NY 39 to NY 17**, 2003
