Perception as Information Detection Jeffrey B. Wagman, Julia J. C. Blau, 2019-07-31 This book provides a chapter-by-chapter update to and reflection on the landmark volume by J. J. Gibson on the Ecological Approach to Visual Perception (1979). Gibson's book was presented a pioneering approach in experimental psychology; it was his most complete and mature description of the ecological approach to visual perception. *Perception as Information Detection* commemorates, develops, and updates each of the sixteen chapters from Gibson's volume. The book brings together some of the foremost perceptual scientists in the field from the United States, Europe, and Asia to reflect on Gibson's original chapters, expand on the key concepts discussed, and relate this to their own cutting-edge research. This

connects Gibson's classic with the current state of the field as well as providing a new generation of students with a contemporary overview of the ecological approach to visual perception. Perception as Information Detection is an important resource for perceptual scientists as well as both undergraduates and graduates studying sensation and perception, vision, cognitive science, ecological psychology, and philosophy of mind.
