Constructing Accessible Web Sites Cynthia Waddell, Bob Regan, Shawn Lawton Henry, Michael R. Burks, Jim Thatcher, Mark D. Urban, Paul Bohman, 2003-07-14 Accessibility is about making websites that don't exclude people with visual, aural or physical disabilities. Through real world examples, this practical book will teach you how to create or retrofit accessible websites quickly and easily. This book is aimed toward web professionals creating accessible websites or updating existing sites to make them accessible. It's also useful for corporate, university and government policy makers involved in the development and maintenance of websites for their institutions. The thorough and practical accessibility techniques outlined in this book come from some of the best accessibility professionals in the business. The techniques are illustrated and accompanied by real world examples from live sites demonstrating that accessibility is not the enemy of great visual design.

Web Accessibility Richard Rutter, Patrick H. Lauke, Cynthia Waddell, Jim Thatcher, Shawn Lawton Henry, Bruce Lawson, Andrew Kirkpatrick, Christian Heilmann, Michael R. Burks, Bob Regan, Mark Urban, 2007-03-19 The power of the Web lies in the fact that anyone and everyone can access it and this should also extend to users with disabilities. Accessibility is about making websites accessible to those with aural, visual or physical disabilities or rather constructing websites that don't exclude these people from accessing the content or services provided. This isn't difficult to accomplish and doesn't require anything more than your normal tool set: HTML, CSS, JavaScript, Flash or whatever else. All you need to do is use these tools in the right way and bear in mind the guidelines that exist to help you keep your websites accessible and the laws that enforce web accessibility around the world. This book gives you all you need to know about web accessibility whether you are a web designer or developer who wants your sites to be accessible or a business manager who wants to learn the impact of web accessibility laws on your websites. After an overview of the accessibility law and guidelines and a discussion about accessibility and its implementation in the enterprise, the book goes on to show how to implement accessible websites using a combination of concise references and easy to follow examples covering: Understanding assistive technologies; Creating accessible content using XHTML, JavaScript, CSS, Flash and PDFs; Testing against WCAG including 2.0 and Section 508; Retrofitting inaccessible sites where necessary. The book concludes with an in-depth analysis of accessibility law around the world. If you're concerned about the legal and moral implications of web accessibility, then this book is perfect for you. It is written by some of the world's experts on accessibility, leaving you in good hands.
