Carbon Footprint Checklist:

Carbon Footprints as Cultural-Ecological Metaphors Anita Girvan, 2017-10-10 Through an examination of carbon footprint metaphors this book demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor. The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change. Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor. This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter. As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts. This book will be of great interest to researchers and students of environmental humanities, political ecology, environmental communication and metaphor studies.

The Health Practitioner's Guide to Climate Change Jenny Griffiths, Mala Rao, Fiona Adshead, Allison Thorpe, 2009-09-01 Highly commended in the Public Health category BMA Medical Awards 2010. There are enormous health benefits from tackling climate change. This is the first book to set out what health practitioners can do to prevent the worst impacts of climate change, to make health services sustainable and to design healthy sustainable communities. The book provides an introduction for health practitioners and students to climate change and its current and future health impacts, describes the relationship between health and the environment, gives facts and figures on greenhouse gas emissions, sets out the huge benefits to health of acting on climate change, explains what health practitioners can do at home, at work and in their organizations, and shows how you can support action in communities nationally and globally. Essential reading for health professionals, local government, built environment professionals, students across all sectors of health, medicine and public administration, community and voluntary sector, NGOs, the business community involved in private healthcare. The Health Practitioner's Guide to Climate Change is written by an authoritative group of authors from key organisations in the field including the Met Office, the Faculty of Public Health, Natural England, the London School of Hygiene and Tropical Medicine, the Climate and Health Council, the NHS Sustainable Development Unit, the Health Protection Agency, the University of the West of England, Sustrans and the National Social Marketing Centre. Sponsored by The National Heart Forum and the National Social Marketing Centre. Foreword by Dr R K Pachauri, Director General, The Energy and Resources Institute, TERI and Chairman, Intergovernmental Panel on Climate Change, IPCC.

Tracking Your Carbon Footprint Judith Purman, 2008-07. Knowing your carbon footprint is a hot button issue today. Consumers now expect their employers, government, and schools to embrace the notion that one's style of living can negatively affect the environment today and for future generations. Likewise, homeowners, businesses, and organizations are moving to more sustainable modes of operating not just because it is the right thing to do but because sustainability, being green, and reducing your carbon footprint have value in the marketplace. Sustainability is marketable and bankable whether in dollars saved in revenues generated or in public relations impact. **Tracking Your Carbon Footprint: A Step by Step Guide to Understanding and Inventorying Greenhouse Gas Emissions** will introduce you to the basics of global climate change, the what, why, and how to inventory your emissions, how to use your inventory to set goals and reduce emissions, and how to determine whether or not it makes sense for you to generate carbon credits.

Chemical Engineering Progress, 2009. *How to Reduce Your Carbon Footprint* Joanna Yarrow, 2008. How to Reduce Your Carbon Footprint is the world citizen's guide to pushing back the advance of global warming. This colorful handbook offers 500 practical, easily achievable ideas that conserve energy, prevent pollution, and save money. Did you know that unplugging appliances and cell phone chargers when not in use can reduce electricity bills by 10 percent? Or that recycling just one glass bottle saves enough power to run a computer for 30 minutes? Whether the subject is jet travel, dish washing, or any of the 50 topics in the book, surprising statistics and innovative graphics will inspire action and demonstrate that simple habits can lead to big results. Carbon Taxes in the EEC* Matthias Beer, 2013-09-11 Studienarbeit aus dem Jahr 2012 im Fachbereich BWL Investition und Finanzierung Note 1 3 FOM Hochschule f r Oekonomie Management gemeinn tzige GmbH M nchen fr her Fachhochschule Veranstaltung MBA Sprache Deutsch Abstract Executive Summary Global warming is becoming a serious issue around the world On a daily base the effects of global warming can be seen and the number of related natural catastrophes is increasing every year The global warming effect is directly re lated to the greenhouse gases GHG which are

freed when fossil fuels are burned In this process carbon dioxide is produced and rises into the atmosphere where it is causing global warming due to reflection of infrared As a counter measure with the aim to reduce the GHGs the Kyoto Protocol was signed on 11th of December 1997 In this regards many policy mechanisms to reduce GHG emissions are discussed and are already exists Scholars are predicting that the mechanism with the strongest effect is pricing on carbon This assignment is explaining briefly the background of carbon dioxide and provides also a short introduction of the carbon footprint of products and enterprises The main part of the work deals with economical aspects of carbon taxation The chapter is analyzing the greenhouse emission trends since 1990 and derives the affected industry sectors for carbon taxation Further the cost of carbon taxation in the EEC is evaluated and an estimated cost increase for a 4 person household in the European member states given The finding of this assignment is that carbon taxation in the EEC is useful and is raising the motivation to develop engines that are more efficient and in addition encourage alternative energy sources At the same time there are also risks involved in carbon taxation if this is only a European decision rather than a global strategy In that case future investments are potentially done outside the EEC due to lower or even no taxation on carbon emission
