Climate Finance Fei Wu,Dayong Zhang,Qiang Ji,2024-07-27 This book focuses on the frontier issues in climate finance and aims to develop a general framework to understand the financial pathways towards a successful energy transition It builds upon the general descriptions of the current status and future challenges towards carbon neutral targets and then bring forward a combination of theoretical and empirical analysis on the critical issues related to climate finance Estimated by the International Energy Agency IEA trillions dollars of investment in energy sector are needed to achieve net zero emission scenario It provides a huge opportunity for our economies meanwhile creates considerable challenges to the

existing system Both financing and investment in such an unprecedented scale cannot possibly be satisfied by the current financial architecture which creates demands for restructuring in the financial sector developing innovative financial instruments building mechanisms to attract private investment and establishing human resources to facilitate climate financing and investment This area is essentially interdisciplinary which requires a fundamental reconsideration of standard approaches Aiming to satisfy the broad interests from both academia and policymakers the contents of this book range from general discussions on critical issues to advanced statistical analyses on key topics Authors hope to bring forward a general picture about climate finance and facilitate the demands for both academic research and policymaking It should also provide a good guidance for graduate students interested in this subject The main contents of this book are based on solid research outcomes but with clear policy relevance The book combines finance theory and practices in both financial markets and energy sectors to reflect the complex nature of financing for energy transition While the materials can provide useful knowledge to policymakers the book can also inspire new research ideas in the relevant area

Toward a PFAS-free Future Simona A Bălan, Thomas A Bruton, Kimberly G Hazard, 2023-11-17 Perfluoroalkyl and polyfluoroalkyl substances PFASs are extensively used in consumer products despite their high persistence and other hazards The risks posed by this chemical class to human health and the environment which are increasingly becoming understood have triggered regulation and policy changes However safer alternatives to these technically effective materials and methods to discover and use those alternatives are still under development Remediation of PFAS contaminated sites will not solve the growing worldwide pollution but substitution with safer substances at the formulation and manufacturing phases will at least abate the flow of PFASs into our bodies and environment Introducing safer alternatives to some of the PFASs of concern used in select industry sectors this book informs the reader about the processes of chemical hazard and alternatives assessment that can foster innovation It is a valuable resource for both green chemists and industrial chemists interested in how they can make their products safer without compromising on function

Brick and Block Masonry Claudio Modena, F. da Porto, M.R. Valluzzi, 2016-11-03 Brick and Block Masonry Trends Innovations and Challenges contains the lectures and regular papers presented at the 16th International Brick and Block Masonry Conference Padova Italy 26-30 June 2016 In an ever changing world in which innovations are rapidly implemented but soon surpassed the challenge for masonry the oldest and most traditional building material is that it can address the increasingly pressing requirements of quality of living safety and sustainability This abstracts volume and full paper USB device focusing on challenges innovations trends and ideas related to masonry in both research and building practice will prove to be a valuable source of information for researchers and practitioners masonry industries and building management authorities construction professionals and educators

In Business, 2005 **Green Building: Principles and Practices in Residential Construction** Abe Kruger, Carl Seville, 2012-01-03 GREEN BUILDING PRINCIPLES AND

PRACTICES IN RESIDENTIAL CONSTRUCTION provides a current comprehensive guide to this exciting emerging field. From core concepts to innovative applications of cutting edge technology and the latest industry trends, this text offers an in-depth introduction to the construction of green homes. Unlike many texts that adopt a product-oriented approach, this book emphasizes the crucial planning processes and execution methods necessary for effective environmentally sound construction. This text demonstrates that Earth-friendly products and energy-efficient materials take planning in order to make a building truly green. This visionary text helps students and professionals develop the knowledge and skills to think green from start to finish, empowering and inspiring them to build truly sustainable homes.
