Speaking Greek:

Greek and Roman Networks in the Mediterranean Irad Malkin, Christy Constantakopoulou, Katerina Panagopoulou, 2013-09-13 How useful is the concept of network for historical studies and the ancient world in particular Using theoretical models of social network analysis this book illuminates aspects of the economic social religious and political history of the ancient Greek and Roman worlds Bringing together some of the most active and prominent researchers in ancient history this book moves beyond political institutions ethnic and geographical boundaries in order to observe the ancient Mediterranean through a perspective of network interaction It employs a wide range of approaches and to examine relationships and interactions among various social entities in the Mediterranean Chronologically the book extends from the early Iron Age to the late Antique world covering the Mediterranean between Antioch in the east to Massalia Marseilles in the west This book was published as two special issues in *Mediterranean Historical Review* Orality and Translation Paul Bandia, 2018-10-11 In the current context of globalization relocation of cultures and rampant technologizing of communication orality has gained renewed interest across disciplines in the humanities and the social sciences Orality has shed its once negative image as primitive non literate and exotic and has grown into a major area of scientific interest and the focus of interdisciplinary research including translation studies As an important feature of human speech and communication orality has featured prominently in studies related to pre modernist traditions modernist representations of human history and postmodernist expressions of artistry such as in music film and other audiovisual media Its wide appeal can be seen in the variety of this volume in which contributors draw from a range of disciplines with orality as the point of intersection with translation studies This book is unique in its exploration of orality and translation from an interdisciplinary perspective and sets the groundwork for collaborative research among scholars across disciplines with an interest in the aesthetics and materiality of orality This book was originally published as a special issue of *Translation Studies* Greek Life and Thought John Pentland Mahaffy, 1887 **Politics of Language** Eleni Bozia, 2024-11-14 Examining the identity and belonging of native and non native speakers of Greek during the time of the High Roman Empire Eleni Bozia closely studies grammarians lexicographers and literary writers who used Attic Greek Bozia argues that transculturalism and translingualism created a new space for both the naturalised and native citizenry In the act of imitating emulating and recreating Attic Greek speakers formed a socio politically distinct and nuanced mode of expression in the social echelons of the Roman world Additionally this is the first book to explore Greek and Latin texts from both a philological and a computational linguistics perspective The result is a consideration of how imitation and innovation affect the social positioning of native and bilingual speakers As such this combined reading of data derived from classical studies in conjunction with computational linguistics offers the context of how to serve a new interpretation of our understanding and appreciation of identity **Sons of Hellenism, Fathers of the Church** Susanna Elm, 2015-09-08 This groundbreaking

study brings into dialogue for the first time the writings of Julian the last non Christian Roman Emperor and his most outspoken critic Bishop Gregory of Nazianzus a central figure of Christianity Susanna Elm compares these two men not to draw out the obvious contrast between the Church and the Emperor's neo Paganism but rather to find their common intellectual and social grounding Her insightful analysis supplemented by her magisterial command of sources demonstrates the ways in which both men were part of the same dialectical whole Elm recasts both Julian and Gregory as men entirely of their times showing how the Roman Empire in fact provided Christianity with the ideological and social matrix without which its longevity and dynamism would have been inconceivable
