

# Speech on the Importance of Science

A very good morning to one and all present here. Today, I'll be giving a short speech on the topic of the importance of science.

Google defines the term 'science' to be "the systematic study of the structure and behaviour of the physical and natural world through observation, experimentation, and the testing of theories against the evidence obtained."

Simply put, "science is the pursuit and application of knowledge and understanding of the natural and social world following a systematic methodology based on evidence." Thus evidential proof as a result of experimentations. This is precisely why science has become very important, especially in today's times.

Science, especially scientific findings, is a game changer in numerous fields such as medicine, technology, and even war. Without science, a lot of diseases would still be life-threatening and many of the technological advancements we have today would be nonexistent. This, I'm sure, would put us back to the vulnerable human beings we had once been.

Science is our future.

Thank You.

## **Speech Science Technology:**

**Speech Science and Technology** ,1993      **Speech Rhythm in Varieties of English** Robert Fuchs,2015-09-25 This book addresses the question whether Educated Indian English is more syllable timed than British English from two standpoints production and perception Many post colonial varieties of English which are mostly spoken as a second language in countries such as India Nigeria and the Philippines are thought to have a syllable timed rhythm whereas first language varieties such as British English are characterized as being stress timed While previous studies mostly relied on a single acoustic correlate of speech rhythm usually duration the author proposes a multidimensional approach to the production of speech rhythm that takes into account various acoustic correlates The results reveal that the two varieties differ with regard to a number of dimensions such as duration sonority intensity loudness pitch and glottal stop insertion The second part of the study addresses the question whether the difference in speech rhythm between Indian and British English is perceptually relevant based on intelligibility and dialect discrimination experiments The results reveal that speakers generally find the rhythm of their own variety more intelligible and that listeners can identify which variety a speaker is using on the basis of differences in speech rhythm      Tutorial Day ,1988      Internet of Things and Connected Technologies Rajiv Misra,Nishtha Kesswani,Muttukrishnan Rajarajan,Veeravalli Bharadwaj,Ashok Patel,2021-05-29 This book presents the recent research adoption of a variety of enabling wireless communication technologies like RFID tags BLE ZigBee etc and embedded sensor and actuator nodes and various protocols like CoAP MQTT DNS etc that has made Internet of things IoT to step out of its infancy to become smart things Now smart sensors can collaborate directly with the machine without human involvement to automate decision making or to control a task Smart technologies including green electronics green radios fuzzy neural approaches and intelligent signal processing techniques play important roles in the developments of the wearable healthcare systems In the proceedings of 5th International Conference on Internet of Things and Connected Technologies ICIoTCT 2020 brought out research works on the advances in the Internet of things IoT and connected technologies various protocols standards etc This conference aimed at providing a forum to discuss the recent advances in enabling technologies and applications for IoT      Edinburgh Journal of Science, Technology and Photographic Art ,1928      **Studies in Musical Acoustics and Psychoacoustics** Albrecht Schneider,2016-12-26 This book comprises twelve articles which cover a range of topics from musical instrument acoustics to issues in psychoacoustics and sound perception as well as neuromusicology In addition to experimental methods and data acquisition modeling such as FEM or wave field synthesis and numerical simulation plays a central role in studies addressing sound production in musical instruments as well as interaction of radiated sound with the environment Some of the studies have a focus on psychoacoustic aspects in regard to virtual pitch and timbre as well as apparent source width for techniques such as stereo or ambisonics in music production Since musical acoustics imply subjects playing instruments or singing in order to produce sound according to musical structures this area is

also covered including a study that presents an artificial intelligent agent capable to interact with a real analog player in musical genres such as traditional and free jazz

**The College Blue Book**, 1977

**Modeling Creativity and Knowledge-Based Creative Design** John S. Gero, Mary Lou Maher, 2013-05-13 Over the last decade research into design processes utilizing ideas and models drawn from artificial intelligence has resulted in a better understanding of design particularly routine design as a process Indeed most of the current research activity directly or indirectly deals only with routine design Not surprisingly many practicing designers state that the level of understanding represented by these models is only of mild interest because they fail to embody any ideas about creativity This volume provides a set of chapters in the areas of modeling creativity and knowledge based creative design that examines the potential role and form of computer aided design which supports creativity It aims to define the state of the art of computational creativity in design as well as to identify research directions Published at a time when the field of computational creativity in design is still immature it should influence the directions of growth and assist the field in reaching maturity

*Prosody and Language in Contact* Elisabeth Delais-Roussarie, Mathieu Avanzi, Sophie Herment, 2015-02-18 This volume provides new insights into various issues on prosody in contact situations contact referring here to the L2 acquisition process as well as to situations where two language systems may co exist A wide array of phenomena are dealt with prosodic description of linguistic systems in contact situations analysis of prosodic changes language development processes etc and the results obtained may give an indication of what is more or less stable in phonological and prosodic systems In addition the selected papers clearly show how languages may have influenced or may have been influenced by other language varieties in multilingual situations where different languages are in constant contact with one another but also in the process of L2 acquisition Unlike previous volumes on related topics which focus in general either on L2 acquisition or on the description and analyses of different varieties of a given language this volume considers both topics in parallel allowing comparison and discussion of the results which may shed new light on more far reaching theoretical questions such as the role of markedness in prosody and the causes of prosodic changes
