physical dimensions Rediscovering the fifth dimension is a brand new 5 dimensional quantum physics model that builds up the entire universe only on energetic oscillating fields and a very special universal substance This substance is actually the difference between whether something can be seen discovered detected or not This universal substance was fully proven by Carl David Anderson as early as the 1930s This semi physical substance is produced only by the Higgs field That's the only reason they were able to discover this Higgs field as the absolute only possible field they could detect in the particle accelerator They found absolutely no physical particles Remember this This is very important if you want to understand the universe as it really appears This new quantum physical hologram model's atoms are only these 4 dimensional oscillating energetic fields which are actually fully proven by the particle accelerator in 2016 As a result 99% of the universe actually consists of an undetectable quantum physics side and 1% is this strange substance This is where reality comes to the surface and becomes fully visible in the highly active 5 dimensional quantum physical universal engine room The fact that something is visible and detectable is only due to the substance This new model reveals Tesla technology and stealth technology and points out the very reason why the UFOs can disappear from today's high tech radars The reason why the UFO can disappear from radar is that there are no physical particles left in the UFO only the atom This substance can disappear again completely controlled also the stealth effect occurs in the UFO The particle accelerator's final and very clear evidence just says that there can be no physical particles and that it actually proves that there has never been a big bang Still today is this fake big bang universe only researched and taught Why Is it only because scientists don't understand the right universe that the particle accelerator actually proved to them should be there The energetic oscillating field universe **Aether Exists**

Joseph George, 2023-02-26 Through my research I have unearthed a significant discrepancy in Einstein's Mass Energy Equivalence principle which is a fundamental cornerstone of his special theory of relativity I have put forth a more sophisticated explanation regarding the manner in which a minute quantity of matter can yield an immense amount of energy My research posits that the missing matter in a nuclear reaction or any event characterized by a mass defect such as supernovae neutron star collisions or black hole mergers undergoes transformation into an ultra fine super thin form of matter This conversion which I term detonation of the missing mass is the underlying mechanism that accounts for the energy release associated with a mass defect This revelation suggests that space is saturated with this ultra fine matter The implications of this discovery have the potential to radically redefine our comprehension of the universe It could furnish novel insights into a plethora of cosmic phenomena that are currently interpreted through the lens of the theory of relativity Being a state of matter this ultra fine form is influenced by gravity resulting in areas of higher density surrounding massive celestial bodies As light traverses these denser regions it experiences refraction and bending This phenomenon could offer an explanation for observations such as the bending of starlight and gravitational lensing Furthermore the density of these regions may have an effect on the frequency of particle vibrations which could shed light on gravitational time dilation The

presence of this matter in space could clarify concepts like Lorentz contraction the increased mass of an object in motion the universal speed limit among others Acknowledging that space is imbued with this particular form of matter heralds a groundbreaking perspective on the universe and paves the way for a new epoch of exploration into its intricacies In addition the realization that this missing matter undergoes a detonation to release energy as a result of a mass defect could be a catalyst for the advancement of cutting edge energy and propulsion technologies Alongside these findings I have developed a novel atomic theory founded on the premise that space is suffused with an exceptionally fine form of matter and an innovative theory of light At present I am assiduously preparing my research for submission to a scientific journal for peer review
