The Testing of Negro Intelligence Dr. Audrey Mary Shuey,1958 African Americans Intelligence levels Intellect Blacks Race and intelligence controversy The Testing of Negro Intelligence Robert Travis Osborne, Frank C. J. McGurk,1982 Summarizes selected studies of differences in mental performance between Black and white test subjects in the United States 1966 1979 using a framework of scientific racism to suggest a genetic basis for the differences Intra-race Testing and Negro Intelligence [by] Paul A. Witty,1936 **Intelligence Testing and Minority Students** Richard R. Valencia, Lisa A. Suzuki,2000-09-19 At last a book that is comprehensive balanced and sensitive in its approach to the intellectual assessment of minority children This book will quickly become a standard text in courses on assessment and diversity Jonathan Sandoval University of California Davis Congratulations to Richard Valencia and Lisa Suzuki for producing a long overdue comprehensive and balanced treatment of cognitive assessment for minority children This volume should prove to be a great value for practitioners and researchers alike Terry Gutkin University of Nebraska Lincoln I believe that Intelligence Testing and Minority Students is absolutely outstanding Valencia and Suzuki demonstrate unusually rich research based theoretical practical and clinical foundations for treating the important and thorough set of topics covered by the book Their underlying compassion is also evident throughout the book I recommend this book to everyone in the field of assessment it is must reading for anyone who tests minority students Alan S Kaufman Yale University School of Medicine This book should be required reading for those who work in this field either in a research or clinical capacity but is especially important for those who have reservations about the use of standardized tests for intellectual assessment It is a highly valuable reference Robert Rueda University of Southern California This is a very rich resource on the history of intelligence testing and it s application to diverse ethnic groups Theoretical and applied topics are well integrated in the discussions Most important is the inclusion of the record of white supremacy ideology the issues of cultural salience in measurement and the issues of usage I know of no other reference on this topic that is as comprehensive as is this one Asa G Hilliard III Georgia State University What roles do socioeconomic status home intellectual environment test bias and heredity play in explaining measured intellectual performance between and within racial ethnic groups Intelligence Testing and Minority Students provides a fresh opportunity to reexamine the construct of intelligence as well as its strengths and weaknesses Viewed as a psychometric tour de force this work provides a concrete argument for prioritizing the nation s testing needs as well as the multicultural perspectives of intelligence Psychometricians and practitioners alike will find this book to be a useful reference in understanding assessment tests and their relationship with minority students With the rising necessity for better and more comprehensive testing it has become of the utmost of importance to respond fairly and validly to the diversity of this nation s citizens The authors have acknowledged this need by including a thorough discussion of cognitive testing issues as well as an

exploration of future movements From the historical views of testing to the future direction of nondiscriminatory assessment no professional should be without this must have reference About the Authors Richard R Valencia Ph D is Professor in the Department of Educational Psychology College of Education at The University of Texas at Austin Dr Valencia s research and scholarly interests include the intellectual and academic development of racial ethnic minority students historical social and psychological status Lisa A Suzuki Ph D is Assistant Professor in the Department of Applied Psychology School of Education at New York University Dr Suzuki previously worked as a school counselor and psychological examiner for the Department of Education in the state of Hawaii Over the years she has administered over 300 intelligence tests to diverse populations Her observations sparked an interest in pursuing a greater understanding of the cognitive abilities and intelligence of diverse racial ethnic populations

The Black-White Test Score Gap Christopher Jencks, Meredith Phillips, 2011-01-01 The test score gap between blacks and whites on vocabulary reading and math tests as well as on tests that claim to measure scholastic aptitude and intelligence is large enough to have far reaching social and economic consequences In their introduction to this book Christopher Jencks and Meredith Phillips argue that eliminating the disparity would dramatically reduce economic and educational inequality between blacks and whites Indeed they think that closing the gap would do more to promote racial equality than any other strategy now under serious discussion The book offers a comprehensive look at the factors that contribute to the test score gap and discusses options for substantially reducing it Although significant attempts have been made over the past three decades to shrink the test score gap including increased funding for predominantly black schools desegregation of southern schools and programs to alleviate poverty the median black American still scores below 75 percent of American whites on most standardized tests The book brings together recent evidence on some of the most controversial and puzzling aspects of the test score debate including the role of test bias heredity and family background It also looks at how and why the gap has changed over the past generation reviews the educational psychological and cultural explanations for the gap and analyzes its educational and economic consequences The authors demonstrate that traditional explanations account for only a small part of the black white test score gap They argue that this is partly because traditional explanations have put too much emphasis on racial disparities in economic resources both in homes and in schools and on demographic factors like family structure They say that successful theories will put more emphasis on psychological and cultural factors such as the way black and white parents teach their children to deal with things they do not know or understand and the way black and white children respond to the same classroom experiences Finally they call for large scale experiments to determine the effects of schools racial mix class size ability grouping and other policies In addition to the editors the contributors include Claude Steele Ronald Ferguson William G Bowen Philip Cook and William Julius Wilson

The Unteachables Keith A. Mayes, 2023-01-24 How special education used disability labels to marginalize Black students in public schools The Unteachables examines the overrepresentation of Black students in special education over the course of

the twentieth century As African American children integrated predominantly white schools many were disproportionately labeled educable mentally retarded EMR learning disabled LD and emotionally behavioral disordered EBD Keith A Mayes charts the evolution of disability categories and how these labels kept Black learners segregated in American classrooms The civil rights and the educational disability rights movements Mayes shows have both collaborated and worked at cross purposes since the beginning of school desegregation Disability rights advocates built upon the opportunity provided by the civil rights movement to make claims about student invisibility at the level of intellectual and cognitive disabilities Although special education ostensibly included children from all racial groups educational disability rights advocates focused on the needs of white disabled students while school systems used disability discourses to malign and marginalize Black students From the 1940s to the present social science researchers policymakers school administrators and teachers have each contributed to the overrepresentation of Black students in special education Excavating the deep seated racism embedded in both the public school system and public policy The Unteachables explores the discriminatory labeling of Black students and how it indelibly contributed to special education disproportionality to student discipline and push out practices and to the school to prison pipeline effect
