

Generative AI, Visual Authorship and Writing with Light: A Guided Discussion

Generative AI is seen as both a benefit and a threat to journalists. In 2022, a group of photojournalists, editors, educators and intellectualists started a conversation about how the visual journalism industry should respond. The result of that was the development of a statement of principles and the Writing with Light website, wwlight.org. As an evolving process, we want to hear what your concerns are and help you focus your conversations around visual authorship through a robust discussion over lunch.

This will happen on Friday, May 16, from 12:15-1:15 at the hotel. Seating is limited for this, a box lunch will be provided and you must be registered for the Northern Short Course to attend.

Visual Authorship

Judd E. Hollander

Visual Authorship:

Visual Authorship Torben Kragh Grodal, Bente Larsen, Iben Thorving Laursen, 2005 *Visual Authorship* is a collection of essays which offers a new approach to the study of authorship. The contributors point out that individual creativity is essential in the richly faceted media landscape of today. The individual creativity and the role of authorship are discussed in relation to film, television, computer games, and the Internet. Theories of cognition and emotion offer new tools for the understanding of visual aesthetics; they explain why works of art are created by individuals and not by discourses and ideologies. Several contributors analyse in detail the works of Lars von Trier.

Visual Authorship Torben Kragh Grodal, Bente Larsen, Iben Thorving Laursen, 2005 *Visual Authorship* is a collection of essays which offers a new approach to the study of authorship. The contributors point out that individual creativity is essential in the richly faceted media landscape of today. The individual creativity and the role of authorship are discussed in relation to film, television, computer games, and the Internet. Theories of cognition and emotion offer new tools for the understanding of visual aesthetics; they explain why works of art are created by individuals and not by discourses and ideologies. Several contributors analyse in detail the works of Lars von Trier.

Authorship and Aesthetics in the Cinematography of Gregg Toland Philip Cowan, 2022-10-03. In this three-part book-length study of the work of Gregg Toland, Philip Cowan explores approaches to co-authorship in collaborative filmmaking to propose new ways of identifying, attributing, and evaluating the creative work of cinematographers. In the first part of the study, Cowan challenges the dominant director-centered auteur approach to film studies, critiquing the historical development of authorship theory and providing a contemporary analysis of the cinematographer's authorial role in creating images that communicate meaning through content and construction. By synthesizing and updating the work of previous film theorists to define the complexities of composition, movement, and lighting in the second part of the study, Cowan develops a new comprehensive taxonomy of functional and aesthetic elements of the moving image. Finally, by using the co-author approach and the analytical tools developed in part two of the book, Cowan provides an in-depth re-examination of Toland's work, highlighting the historical neglect of the cinematographer's artistic contribution to filmmaking and developing a fresh approach to the analysis of contemporary cinematography in film.

A Guide to Responsible Research Ana Marusic, 2023-03-27. This Open Access book is a guide to good responsible research at each step of the process of research discovery so that a researcher at the beginning of a scientific career has a clear pathway to doing good research and producing reliable results. The textbook will give context to the practices described in the European Code of Conduct for Research Integrity, guided by the fundamental principles of research integrity: reliability, honesty, respect, and accountability. Although we base the book on the European Code, the principles are the same in the global research community, such as those outlined in *Fostering Integrity in Research* from the US National Academies of Engineering and Medicine. The chapters in the book follow good research practices, give practical advice, and address basic principles. In this way, the book is applicable.

to different research fields It directs readers to various sources for further and updated information particularly drawing from the resources available at The Embassy of Good Science the European platform for research integrity and ethics

European Film and Media Culture Lennard Højbjerg, Henrik Søndergaard, 2006 Brings into focus central aspects of developments in European film and media culture Through studies of both film and television the question of national identity European integration and globalisation is analysed in a both Eastern and Western European context This volume also offers several case studies

ReFocus: The Films of Agnieszka Holland Elzbieta Ostrowska, 2024-07-31 The Films of Agnieszka Holland is the first monograph devoted to the internationally most famous Polish filmmaker a three times Oscar nominee and the recipient of numerous film festival prizes It examines her rich original oeuvre which ranges from Holocaust dramas such as *Europa Europa* 1990 to episodes of the HBO series *The Wire* In examining the multifaceted nature of Holland's authorship the study situates her work in the context of art popular national European Hollywood transnational women's and queer cinema as well as global television projects Her colourful public persona oscillates among auteur celebrity director and political activist in an extraordinary professional trajectory which started in the Eastern Bloc continued in Western Europe and North America then backtracked to a unified Europe That zigzagged route conveys the unique nature of Holland's career while epitomising the transformations of post Cold War cultural production

The Language of Art and Artists Darryl Hocking, 2025-08-08 This book brings together the research of leading scholars who explore the complex interplay between language and art Employing a diversity of methods including systemic functional linguistics corpus analysis multimodal analysis genre analysis discourse analysis and cognitive linguistics this edited collection offers fresh perspectives on the role of textual practices in shaping artistic production interpretation and engagement across a range of cultural and institutional contexts The chapters examine a wide range of written and spoken texts including artists statements art reviews painting titles museum press releases artists websites guided tours audio descriptions and artist talks This timely volume is relevant for students teachers and researchers in language and applied linguistics discourse analysis and visual arts as well as those in the areas of art theory and curatorial studies It will also appeal to academic literacies and ESP English for Specific Purposes practitioners supporting visual arts students worldwide

Einstein on the Beach: Opera beyond Drama Jelena Novak, John Richardson, 2019-12-06 Philip Glass and Robert Wilson's most celebrated collaboration the landmark opera *Einstein on the Beach* had its premiere at the Avignon Festival in 1976 During its initial European tour Metropolitan Opera premiere and revivals in 1984 and 1992 *Einstein* provoked opposed reactions from both audiences and critics Today *Einstein* is well on the way itself to becoming a canonized avant garde work and it is widely acknowledged as a profoundly significant moment in the history of opera or musical theater *Einstein* created waves that for many years crashed against the shores of traditional thinking concerning the nature and creative potential of audiovisual expression Reaching beyond opera its influence was felt in audiovisual culture in general in contemporary avant garde music performance art avant garde cinema

popular film popular music advertising dance theater and many other expressive commercial and cultural spheres Inspired by the 2012 2015 series of performances that re contextualized this unique work as part of the present day nexus of theoretical political and social concerns the editors and contributors of this book take these new performances as a pretext for far reaching interdisciplinary reflection and dialogue Essays range from those that focus on the human scale and agencies involved in productions to the mechanical and post human character of the opera s expressive substance A further valuable dimension is the inclusion of material taken from several recent interviews with creative collaborators Philip Glass Robert Wilson and Lucinda Childs each of these sections comprising knee plays or short intermezzo sections resembling those found in the opera Einstein on the Beach itself The book additionally features a foreword written by the influential musicologist and cultural theorist Susan McClary and an interview with film and theater luminary Peter Greenaway as well as a short chapter of reminiscences written by the singer songwriter Suzanne Vega

From a Photograph Geoffrey Belknap,2020-08-13

Throughout its early history photography s authenticity was contested and challenged how true a representation of reality can a photograph provide Does the reproduction of a photograph affect its value as authentic or not From a Photograph examines these questions in the light of the early scientific periodical press exploring how the perceived veracity of a photograph its use as scientific evidence and the technologies developed for printing it were intimately connected Before photomechanical printing processes became widely used in the 1890s scientific periodicals were unable to reproduce photographs and instead included these photographic images as engravings with the label from a photograph Consequently every image was mediated by a human interlocutor introducing the potential for error and misinterpretation Rather than reading photographs in the context of where or how they were taken this book emphasises the importance of understanding how photographs are reproduced It explores and compares the value of photography as authentic proof in both popular and scientific publications during this period of significant technological developments and a growing readership Three case studies investigate different uses of photography in print using pigeons to transport microphotographs during the Franco Prussian War the debate surrounding the development of instantaneous photography and finally the photographs taken of the Transit of Venus in 1874 unseen by the human eye but captured on camera and made accessible to the public through the periodical Addressing a largely overlooked area of photographic history From a Photograph makes an important contribution to this interdisciplinary research and will be of interest to historians of photography print culture and science

Authors in Disguise Roberta Rosenthal Kwall,2012 Moral rights protection exists to recognize authorship autonomy by safeguarding the author s meaning and message Despite the fact that all authors owe a debt to the past the authorship construct as we know it today embodies the idea of crafting a work so that it embodies the author s personal stamp of autonomy Notwithstanding the borrowing inherent in the authorship process it is still the author who on an individual or joint basis composes the creative package When a work of authorship manifests a meaning and message specific to the author the moral

right of attribution safeguards the author's original conceptions. Attribution is a vital and perhaps the most widely endorsed component of authorship dignity. An author's choice of attribution is very much part of a work's meaning and message and as such it plays a central role in communicating the essence of an author's work to her audience. Even anonymous or pseudonymous works can be seen as reflecting a branding choice that is a fundamental part of the author's meaning and message. When the author's attribution of choice is omitted without permission of the author, the original work is somehow incomplete. Attribution thus functions as a significant and widely acknowledged means of safeguarding the integrity of an author's text. A large number of copyrighted works are produced outside the framework of an individual author whose identity is known to the public. Works created outside of the traditional authorship trope include those produced by authors who write anonymously or under a pseudonym, works for hire, and even collective works. The relationship between moral rights and works created by authors in disguise is problematic because if the primary objective of moral rights is to safeguard the meaning and message of an author's work, it would seem as though the true author's identity should be publicly known. Yet for the types of works discussed in this Article, this knowledge is not readily available. This Article explores these difficulties as a general matter with particular focus on the failure of the Visual Artists Rights Act (VARA) to incorporate explicit protection for anonymous and pseudonymous works and its exclusion of works made for hire from the scope of its coverage. VARA is the primary federal codification of moral rights in the United States and thus its provisions represent the most significant embodiment of the doctrine in this country. I argue that in light of the theoretical predicate for moral rights, VARA's exclusions are misguided.

The Cinema of Lars Von Trier Caroline Bainbridge, 2007. Lars von Trier is the most controversial figure of contemporary European cinema. This volume is the first book to analyse in depth the changes he has brought to modern film. Since founding the back to basics Dogme philosophy of filmmaking in 1995, von Trier's name has become a byword for taboo-breaking cinema. As a director, he has courted media controversy through films such as *The Idiots* (1998) with its unsimulated sex and non-conformist politics, and through his complex relationships with actresses such as Björk and Nicole Kidman, from whom he coaxed career-best performances in *Dancer in the Dark* (2000) and *Dogville* (2003) respectively. Analysing these films, as well as recent works such as *The Five Obstructions* (2004) from a psychoanalytic perspective, it forges a new understanding of the founder of Dogme 95 as a great democratizer of cinema in the digital age, presenting von Trier as one of the most daring

cinematic exponents of postmodern politics and satire

The National Society of Film Critics on the Movie Star
