Redefining Fatherhood Nancy E. Dowd, 2000 Down law U of Florida offers a progressive discussion of the economic social and legal aspects of fathering making a case for greater emphasis on the social nurturing behavior involved in parenting to redefine the role men play in the lives of their children She also explores the barriers to such redefinition including concepts of masculinity the interconnections between fathers and mothers male violence and homophobia Annotation copyrighted by Book News Inc Portland OR

The Man Question Nancy E. Dowd, 2010-09-20 Among the many important tools feminist legal theorists have given scholars is that of anti essentialism all women are not created equal and privilege varies greatly by circumstances particularly that of race and class Yet at the same time feminist legal theory tends to view men through an essentialist lens in which men are created equal The study of masculinities inspired by feminist theory to explore the construction of manhood and masculinity questions the real circumstances of men not in order to deny men's privilege but to explore in particular how privilege is constructed and what price is paid for it In this groundbreaking work feminist legal theorist Nancy E Dowd exhorts readers to apply the anti essentialist model so dominant in feminist jurisprudence to the study of masculinities She demonstrates how men's treatment by the law and society in general varies by race economic position sexuality and other factors She applies these insights to both boys and men examining how masculinities analysis exposes both privilege and subordination She examines men's experience of fatherhood and sexual abuse and boys experience in the contexts of education and juvenile justice Ultimately Dowd calls for a more inclusive feminist theory which by acknowledging the study of masculinities can broaden our understanding of privilege and subordination
