

What Is A Force

Michael Hoelscher

What Is A Force:

Force: What Is Force? Gr. 5-8 George Graybill, 2015-10-01 This is the chapter slice What Is Force from the full lesson plan Force Forces are at work all around us Discover what a force is and different kinds of forces that work on contact and at a distance We use simple language and vocabulary to make this invisible world easy for students to see and understand Examine how forces add up to create the total force on an object and reinforce concepts and extend learning with sample problems Students will learn about balanced and unbalanced forces weight and gravity and magnetic and electrostatic forces and much more Written for remedial students in grades 5 to eight Reading passages activities for before and after reading and color mini posters make both teaching and learning a breeze Crossword Word Search comprehension quiz and test prep included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives

What is Matter and what is Force? Helena Petrovna Blavatsky, Life whether in its latent or dynamic form is Electricity i e Force or Spirit moving Matter Spirit is a bright flame within a transparent globule its vehicle or soul What we call light is an impression produced upon the retina by the wave like motion of the particles of matter Light like heat of which the former is the crown is simply the ghost the shadow of matter in motion the boundless eternal Infinite Space Motion Duration the Trinitarian essence of that which the Deists call God and we the One Element Spirit and Matter are two poles of One Eternal Element they are interdependent and mutually convertible Force and Matter Spirit and Matter or Deity and Nature though they may be viewed as opposite poles in their respective manifestations in essence and in truth are One Life is present as much in a dead as in a living body in inorganic as in organic matter *War Is a Force that Gives Us Meaning* Chris Hedges, 2014-04-08 From a Pulitzer Prize winning journalist and bestselling author an unflinching and close up look at war its intoxicating allure its gruesome realities and the grander truths it exposes about humanity A brilliant thoughtful timely and unsettling book Abounds with Hedges harrowing and terribly moving eyewitness accounts The New York Times Finalist for the National Book Critics Circle Award for Nonfiction As a veteran war correspondent Chris Hedges has survived ambushes in Central America imprisonment in Sudan and a beating by Saudi military police He has seen children murdered for sport in Gaza and petty thugs elevated into war heroes in the Balkans Hedges has seen war at its worst and knows too well that to those who pass through it war can be exhilarating and even addictive Drawing on his own experience and on the literature of combat from Homer to Michael Herr Hedges shows how war seduces not just those on the front lines but entire societies corrupting politics destroying culture and perverting basic human desires Mixing hard nosed realism with profound moral and philosophical insight *War is a Force That Gives Us Meaning* is a work of haunting power and redemptive clarity whose truths have never been more necessary Inertia, the Great Occult Force in our Kosmos, is unknown to modern Science Helena Petrovna Blavatsky, 2023-01-01 The concepts of the West are the allegories of the East and the truths of the Elect Behind the veil of terrestrial phenomena the Occultist sees in the Elemental Forces of Nature secondary Causes which

are in themselves the effects of primary Causes produced and guided unerringly by Divine Intelligences The idea of anything in Nature being inorganic or dead is materially fallacious and is utterly rejected by Esoteric Philosophy When matter appears inert it is the most active A stone block is motionless and impenetrable to all intents and purposes Nevertheless its particles are in ceaseless eternal vibration which is so rapid that to the physical eye the stone seems devoid of motion Substance is the pre cosmic substratum of matter undifferentiated yet interrelated with Ideation supersensuous but atomic informed by the Divine Breath of its form Substance does not mean matter in metaphysics It is boundless ther formless and supernal the ultimate essence of matter in Space and noumenon of evanescent matter on Earth Ether is physical and infernal Kosmos is Eternal Noetic Motion Unmanifested the Great Breath of One Element Father ther is the source and cause of All Cosmic Forces which are differentiated aspects of Cosmic Substance generated by substantial yet super sensuous Powers Our Cosmos is ruled by Creative and Intelligent Occult Forces they are emanations of conscious living entities acting behind the veil of matter The forces we know of are but the phenomenal manifestations of realities we know nothing about but which were known by the ancients The truths of today are the falsehoods of yesterday Conceit and prejudice strangle every truth As only truth can dispel error Truth should be the sole aim of Science and Justice It is true that pure Force is nothing in the world of physics but it is the All in the domain of metaphysics Inertia is the Greatest of Occult Forces A flying cannon ball moves only from its own inherent Force of Inertia Eternal Vibration is the spiritual term for Motion Unmanifested unconscious innate noumenal It is the Great Breath of the One Eternal Element Vortical Motion is the material term for Motion Manifested conscious external phenomenal Whatever may be the future name given to the Force of Inertia by scientists to maintain that that Force does not reside in the atoms but only in the space between them is not true To the mind of an Occultist it is like saying that water does not reside in the drops of which the ocean is composed but only in the space between those drops The Atom belongs wholly to the domain of metaphysics It is an entified abstraction and has nought to do with physics strictly speaking as it can never be brought to the test of retort or balance Avogadro s law holds the same place in chemistry as the law of gravitation does in astronomy Occultists see in gravity only Sympathy and Antipathy or Attraction and Repulsion caused by physical polarity on our terrestrial plane and by spiritual causes beyond our illusive earth Matter to the Occultist and to those men of Science who care too much for truth and too little for their vanity to dogmatise is that totality of existences in the Kosmos which falls within any of the planes of possible perception If Scientists could fathom the ultimate nature of these Forces they would have first to admit their substantial nature however supersensuous Science merely traces the sequence of phenomena on a plane of effects illusory projections from the region that Occultism has long since penetrated Light and heat sound and cohesion are the ghosts or shadows of matter in motion However there is no fundamental difference between light and heat each is merely a metamorphosis of the other Heat is light in complete repose Light is heat in rapid motion When light is combined with a body it becomes heat but when thrown off from that body heat

reverts to light Occult Science may err in particulars but it can never become guilty of a mistake in questions of Universal Laws simply because Divine Science was born on higher planes and was brought on Earth by Beings who were far wiser than man will ever be Occult Science may be less well informed as to the behaviour of compound elements in various cases of physical correlations still it is immeasurably higher in its knowledge of the ultimate occult states of matter and of the true nature of matter than all the Academies of Science of our day may possess Occult Science does not regard either electricity or any of the forces supposedly generated by it as matter in any of the states known to physical Science None of these forces so called are either solids gases or fluids An Occultist would even object to electricity being called a fluid as it is an effect and not the cause But its noumenon he would say is a conscious cause The force which materialism considers as the cause of the diversity that surrounds us is in sober reality only an effect i e a result of that diversity In other words the cause of any force is not matter but motion itself And thus the great dogma no force without matter and no matter without force is dethroned and loses the solemn significance with which materialism has tried to invest it If nature abhors vacuum what is atom To admit the divisibility of the atom amounts to an admission of an infinite divisibility of substance which is equivalent to reducing substance to nothingness If the Universe is composed of atoms then those atoms must be elastic Absolutely non elastic atoms could never exhibit a single one of those numerous phenomena that are attributed to their correlations Without any elasticity the atoms could not manifest their energy and the substance of the materialists would remain weeded of every force Materialism is now enmeshed in a fatal circle of its own making If the blind inertia of physical Science is replaced by the Intelligent Active Powers behind the veil of illusive matter motion and inertia become subservient to those Powers Acceptance of the infinite divisibility of the atom opens limitless horizons to Substance informed by the Divine Breath of its Soul in every possible state of tenuity states still undreamt of even by the most spiritually disposed chemists and physicists But alas the insanities of materialism and pessimism are incurable The most Science can do is to assume the attitude of agnosticism But to do this requires a boundless love of truth and the surrender of the prestige of infallibility which the men of Science have acquired among the flippant masses Dualistic and anthropomorphic may be the philosophy of Vishisht Advaita when compared with the non duality of Advaita it is yet supremely higher in logic and philosophy than the cosmogenesis exalted by Christianity and Science its great opponents
