Legal Protection of Genetic Resources and Traditional Knowledge from a Social Network Perspective Elnur Karimov, 2025-12-09 This book explores the urgent and evolving legal challenges surrounding the use of genetic resources and traditional knowledge TK particularly those held by Indigenous Peoples and local communities International frameworks like the Nagoya Protocol and the 2024 WIPO Treaty aim to regulate benefit sharing but legal enforcement remains weak This book argues that traditional legal approaches both international and national alone are no longer sufficient and proposes a network focused enforcement and compensation mechanism that uses social network analysis to examine the flow of genetic materials and TK through national and global supply chains This approach is applied to 30 real world biopiracy case studies across diverse regions including Asia Latin America and Africa to identify legal blind spots and power asymmetries The book explains how predicting central nodes within supply chains where biopiracy and misappropriation are most likely to occur can lead to better enforcement and compensation outcomes It then concludes with policy recommendations and suggestions to design more robust protection mechanisms for genetic resources and the associated TK This book will interest scholars of intellectual property and biotechnology law as well as scholars of indigenous studies Policymakers indigenous activists and social scientists who are interested in the broader applications of social network analysis will also find this of note

Indigenous Rights Anthony J. Connolly, 2017-05-15 Throughout the world indigenous rights have become increasingly prominent and controversial The recent adoption by the United Nations General Assembly of the Declaration on the Rights of Indigenous Peoples is the latest in a series of significant developments in the recognition of such rights across a range of jurisdictions The papers in this collection address the most important philosophical and practical issues informing the discussion of indigenous rights over the past decade or so at both the international and national levels Its contributing authors comprise some of the most interesting and influential indigenous and non indigenous thinkers presently writing on the topic

Intellectual Property Thomas Cottier, Petros Constantinou, Mavroidis, Marion Panizzon, 2010-04-23 The incorporation of intellectual property protection into the WTO international trading system has been a milestone in international economic law and has added a new dimension to trade regulation new rights and obligations and new challenges alike The contributors leading scholars and practitioners in the field provide insights into the legal relationship of the TRIPs Agreement to the GATT 94 and the GATS The book widens the debate with a thorough discussion on pending and unresolved relations of TRIPs the WTO UPOV the Convention on Biodiversity and Farmers Rights contained in the FAO International Undertaking and efforts of the World Bank GCIAR system including IPGRI What will be the impact of TRIPs on ownership of plant genetic resources Largely a victory for OECD countries the present

state of intellectual property rights has important implications for developing countries The incorporation of intellectual property rights into the WTO system will eventually change the relationship of trade competition and intellectual property It will equally have to assist in providing equitable sharing of benefits in the use of plant genetic resources All of these issues are essential for the revision of exclusions from patenting in TRIPs This volume offers insights into how this difficult task could and should be approached in a balanced manner and will be essential reading for economists and trade and intellectual property lawyers interested in the subject Moreover the volume will be relevant to agricultural economists as it addresses complex problems in the interstices of trade intellectual property plant genetic resources and sustainable development

Thomas Cottier is Professor of European and International Economic Law University of Bern and Managing Director World Trade Institute University of Bern Petros C Mavroidis is Professor of Law University of Neuchâtel He formerly worked in the Legal Affairs Division of the World Trade Organization Marion Panizzon is Research Fellow University of Bern Simon Lacey is Research Fellow University of Bern

Rethinking European Union Foreign Policy Ben Tonra, Thomas Christiansen, 2004 This text reviews a variety of approaches to the study of the European Union's foreign policy Much analysis of EU foreign policy contains implicit theoretical assumptions about the nature of the EU and its member states their interrelationships the international system in which they operate and the nature and direction of European integration In many instances such assumptions given that they are not discussed openly curtail rather than facilitate debate The purpose of this book is to open up this field of enquiry so that students observers and analysts of EU foreign policy can review a broad range of tools and theoretical templates from which the development and the trajectory of the EU's foreign policy can be studied
