Everyland Lucy W. Peabody, Helen Barrett Montgomery, 1911 **Everyland** ,1912 **Conceptual Structures in Practice** Pascal Hitzler, Henrik Scharfe, 2016-04-19 Exploring fundamental research questions Conceptual Structures in Practice takes you through the basic yet nontrivial task of establishing conceptual relations as the foundation for research in knowledge representation and knowledge mining It includes contributions from leading researchers in both the conceptual graph and formal concept analysis Sean O'Casey R. Ayling, M.J. Durkan, 1978-06-17 *Beckwith's Almanac* George Beckwith, 1857 *Investigating Art, History, and Literature with Astronomy* Donald W. Olson, 2022-03-17 How can shadows determine the date and time of a painting by Johannes Vermeer How did the Moon and tides cause the loss of King John's crown jewels In his newest book Professor Olson author of *Celestial Sleuth* and *Further Adventures of the Celestial Sleuth* explores how astronomical clues can uncover fascinating new details about art history and literature He begins with an accessible introduction to amateur celestial sleuthing showing how to use your astronomical knowledge software archives vintage maps historical letters and diaries military records and other resources to investigate the past Follow along as Professor Olson then explores twenty real world cases where astronomy has helped answer unresolved questions or correct longstanding interpretations about an event Examples involve artists such as Vermeer Monet and O'Keeffe the historical exploits of Alexander the Great the desert travels of the Death Valley 49ers and a meeting between Franklin D Roosevelt and Winston Churchill in Marrakech and literary works by Chaucer Shakespeare and Longfellow Packed with dozens of full color illustrations this book will enrich your knowledge of the past and equip you with all the tools you'll need to become a celestial sleuth yourself Many people have a passion for art or world history or great literature or even astronomy but seldom in all these things at once This remarkable book by Donald Olson of Texas State University will put you in touch with such seemingly unrelated endeavors It will open your eyes and broaden your mind as little else could Roger W Sinnott *Sky Telescope* American Horticultural Annual ,1871 **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric

view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa
