

DEALING WITH INTENSE EMOTION

T

Tip the temperature of your body with cold/ice water

When our emotions are overwhelmingly intense, it's difficult for our brain to process info and calm ourselves down.

I

Intense exercise for ~20 minutes

The TIPP skill comes from DBT and it uses your body chemistry to help slow your heart rate and regulate your breathing.

P

Paced breathing (in for 4, hold for 4, out for 4, repeat)

As the TIPP skills are a "quick fix," make sure you don't overdo it. Rather, use the skills in a pinch to help the negative emotion pass.

P

Progressive muscle relaxation

Behavior Therapy Techniques Joseph Wolpe,Arnold A. Lazarus,1966 The techniques of habit termed behavior therapy have been adopted by a constantly increasing number of psychotherapists but the gathering of information about them by both students and practitioners is still a matter of some difficulty The authors have accordingly prepared this book to serve as a source of instruction on the practical approach to the neurotic patient as an organism whose habits of reaction are completely determined by his constitution and by the impact of his environment upon him and on the treatment of neuroses by the techniques that have been based on principles of conditioning learning The book shows that therapy is conducted with a general understanding of the patient s reactions and problems and that he frequently has to be disabused of moralistic notions and other unnecessary sources of anxiety before conditioning procedures can be successfully carried out A matter that has hitherto been given scarcely any attention is the tremendous extent of the difference of attitude between behavior therapists and dynamically oriented therapists The characterization of this difference of attitude and instruction for its development and use in therapy are among the most important features of the book
