Visual Statistics Forrest W. Young, Pedro M. Valero-Mora, Michael Friendly, 2011-09-15 A visually intuitive approach to statistical data analysis *Visual Statistics* brings the most complex and advanced statistical methods within reach of those with little statistical training by using animated graphics of the data Using ViSta The *Visual Statistics* System developed by Forrest Young and Pedro Valero Mora and available free of charge on the Internet students can easily create fully interactive visualizations from relevant mathematical statistics promoting perceptual and cognitive understanding of the data's story An emphasis is placed on a paradigm for understanding data that is visual intuitive geometric and active rather than one that relies on convoluted logic heavy mathematics systems of algebraic equations or passive acceptance of results A companion Web site complements the book by further demonstrating the concept of creating interactive and dynamic graphics The book provides users with the opportunity to view the graphics in a dynamic way by illustrating how to analyze statistical data and explore the concepts of visual statistics *Visual Statistics* addresses and features the following topics Why use dynamic graphics A history of statistical graphics Visual statistics and the graphical user interface Visual statistics and the scientific method Character based statistical interface objects Graphics based statistical interfaces Visualization for exploring univariate data This is an excellent textbook for undergraduate courses in data analysis and regression for students majoring or minoring in statistics mathematics science engineering and computer science as well as for graduate level courses in mathematics The book is also ideal as a reference self study guide for engineers scientists and mathematicians With contributions by highly regarded professionals in the field *Visual Statistics* not only improves a student's understanding of statistics but also builds confidence to overcome problems that may have previously been intimidating

GeoSpatial Visual Analytics Raffaele de Amicis, R. Stojanovic, Giuseppe Conti, 2009-07-11 Access distribution and processing of Geographic Information GI are basic preconditions to support strategic environmental decision making The heterogeneity of information on the environment today available is driving a wide number of initiatives on both sides of the Atlantic all advocating both the strategic role of proper management and processing of environment related data as well as the importance of harmonized IT infrastructures designed to better monitor and manage the environment The extremely wide range of often multidimensional environmental information made available at the global scale poses a great challenge to technologists and scientists to find extremely sophisticated yet effective ways to provide access to relevant data patterns within such a vast and highly dynamic information flow In the past years the domain of 3D scientific visualization has developed several solutions

designed for operators requiring to access results of a simulation through the use of 3D visualization that could support the understanding of an evolving phenomenon However 3D data visualization alone does not provide model and hypothesis making neither it provide tools to validate results In order overcome this shortcoming in recent years scientists have developed a discipline that combines the benefits of data mining and information visualization which is often referred to as Visual Analytics VA
