War Weapons:

Instruments of War Spencer C. Tucker, 2015-07-28 This highly detailed and well illustrated single volume work documents the evolution of warfare across history through weaponry and technological change In war the weapons and technologies employed have direct effects on how battles are waged When new weapons are introduced they can dramatically alter the outcomes of warfare and consequently change the course of history itself This reference work provides a fascinating overview of the major weapon systems and military technologies that have had a major impact on world history Addressing weapons as crude as the club used by primitive man to the high tech weapons of today such as unmanned drones *Instruments of War Weapons and Technologies That Have Changed History* offers nearly 270 profusely illustrated entries that examine the key roles played by specific weapons and identify their success and failures The book begins with an introductory essay that frames the subject matter of the work and discusses the history of weapons as a whole The text is concise and accessible to general readers without extensive backgrounds in military history yet provides the detailed information necessary to convey the complexity of the evolution of warfare through technological change **Weapons** Diagram Group, 1990 This definitive guide covers the entire history of weapons from the earliest most primitive instruments up to remarkable advances in modern defense and warfare including Riot control devices Electrified nightsticks Infantry weapons Multiple launch rockets Fiber optic missiles Wire guided torpedoes Stealth technology **Weapons of War** Jeff Groman, 1985 A book all about the weapons of war ships aircraft helicopters tanks guns etc **Fifty Weapons That Changed the Course of History** Joel Levy, 2014-09-04 The saga of human civilization has been formed and scarred by conflict At each stage of our history there have been defining episodes of violence sometimes long and simmering at other times sudden and cataclysmic And each stage has produced new forms of weaponry Some of these weapons of war have been decisive such as the terrifying war elephants deployed by Hannibal at the battle of Cannae in 216 B C Others have become iconic in our culture Chief among these is the AK 47 symbol of communism and now of terrorism and the most widely found firearm in the world Some weapons have been definitive in their simplicity such as the bayonet in other cases such as the Tomahawk cruise missile the sheer complexity is dazzling *Fifty Weapons that Changed the Course of History* tells the story of the last 3 500 years through the weapons that have shaped it The technical specifications statlingly illustrated are given context and meaning by explaining their part in human conflict and their long tem legacy More than a manual of materiel this is the story of the weapons that formed our world **Secret Weapons and World War II** Walter E. Grunden, 2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research

military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East
