Kaplan,2013-02-19 If it looks right it will probably fly right a tired old saying among airmen but one that persists Think if you will of the handful of aeroplanes that most people would probably agree are the best looking examples of all The list is short but distinguished and the proof is in the enthusiastic common view of most pilots who have flown them for nearly all it was love at first sight and first flight For most that little list includes the Vickers Supermarine Spitfire the Douglas DC 3 the Hawker Hunter the Lockheed Constellation the Concord and the North American Mustang Of these the Spitfire and Mustang stand out and remain extra special to the majority of pilots who have been privileged to fly them One common thread exists among those who have experienced both of these fine machines an opinion that seems to hold up even after a lifetime of flying the best the aviation design community has created While the Spitfire may have a slight edge in light touch handling if I have to go to war in one type I'll take the Mustang every time This comprehensive account of the Mustang aircraft charts the operational history of the craft and also relays a the personal stories and experiences of the men who flew the Cadillac of the skies as it has been described A vivid and enthralling history set to appeal to aviation enthusiasts looking for more than just a mere operational history of the Mustang's exploits *The British National Bibliography* Arthur James Wells,2003
