Theorizing the City Setha M. Low, 1999 Anthropological perspective are not often represented in urban studies even though many anthropologist have been contributing actively to theory and research on urban poverty racism globalization and architecture Theorizing the City corrects this omission Following a brief history of urban anthropology emphasizing developments in the field during the 1990s this volume presents twelve ethnographies of major cities in the Americas Africa Asia and Europe Five images of the city the divided city the contested city the global city the modernist city and the postmodern city serve as frameworks for the essays Each section highlights current research trends such as poststructural studies of race class and gender in the urban context political economic studies of transnational culture and studies of the symbolic meanings and social production of urban spaces

A People's History of Detroit Mark Jay, Philip Conklin, 2020-04-17 Recent bouts of gentrification and investment in Detroit have led some to call it the greatest turnaround story in American history Meanwhile activists point to the city's cuts to public services water shutoffs mass foreclosures and violent police raids In A People's History of Detroit Mark Jay and Philip Conklin use a class framework to tell a sweeping story of Detroit from 1913 to the present embedding Motown's history in a global economic context Attending to the struggle between corporate elites and radical working class organizations Jay and Conklin outline the complex sociopolitical dynamics underlying major events in Detroit's past from the rise of Fordism and the formation of labor unions to deindustrialization and the city's recent bankruptcy They demonstrate that Detroit's history is not a tale of two cities one of wealth and development and another racked by poverty and racial violence rather it is the story of a single Detroit that operates according to capitalism's mandates

The Sanitary City Martin V. Melosi, 2008-04-27 Immersed in their on demand highly consumptive and disposable lifestyles most urban Americans take for granted the technologies that provide them with potable water remove their trash and process their wastewater These vital services however are the byproduct of many decades of development by engineers sanitarians and civic planners In The Sanitary City Martin V Melosi assembles a comprehensive thoroughly researched and referenced history of sanitary services in urban America He examines the evolution of water supply sewage systems and solid waste disposal during three distinct eras The Age of Miasmas pre 1880 The Bacteriological Revolution 1880 1945 and The New Ecology 1945 to present day Originally

published in 2000 this abridged edition includes updated text and bibliographic materials The Sanitary City is an essential resource for those interested in environmental history environmental engineering science and technology urban studies and public health **Catalogue of the Library of the Peabody Institute of the City of Baltimore** ,1883 *The Revised Ordinances of the City of Davenport* Davenport (Iowa),1866 The City Builders Susan S. Fainstein,2001 This revised edition examines major redevelopment efforts in New York and London to uncover the forces behind these investment cycles and the role that public policy can play in moderating market instability It chronicles the progress of three development projects in New York and three in London Catalogue of the Library of the Peabody Institute of the City of Baltimore ... George Peabody Library,1889 **City of Chicago V. Courts of Appeals,1886 **The Radicals' City: Urban Environment, Polarisation, Cohesion** Ralf Brand,Sara Fregonese,2016-02-24 Bringing together comparative case studies from Belfast Beirut Amsterdam and Berlin this book examines the role of the urban environment in social polarisation processes In doing so it provides a timely and refreshingly innovative voice in the confusing babble on counter terrorism urban conflict and community cohesion Despite their socio political differences these cities are telling cases of how the location and shape of very mundane objects such as rubbish bins bridges clothes stores shopping malls and caf s in addition to the obvious fences walls and barbed wire are often subject to heated controversies and influence the way urban conflict is lived and practised Within a Science and Technology Studies STS theoretical framework the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of material agency without losing sight of their specific historical political geographical and social conditions The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation neither is it completely innocent Conversely it cannot be the silver bullet to solve related problems and to create community cohesion However the materiality of our cities must not be ignored in fact it can and should be enrolled in our efforts The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers architects urban designers planners community workers consultants or police officers *Municipal Register of the City of Hartford ...* Hartford (Conn.),1901 Cement Division, National Gypsum Co. V. City of Milwaukee ,1985 *The Charter and Revised Ordinances of the City of Muscatine* Muscatine, Ia,1878 *The Southwestern Reporter* ,1912 *Revitalizing Urban Neighborhoods* William Dennis Keating,Norman Krumholz,Philip Star,1996 Since the 1950s and the advance of urban renewal local governments and urban policy have focused heavily on the central business district However such development has all but ignored the inner city neighborhoods

that continue to struggle in the shadows of high rise America This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development Together they show how urban neighborhoods can and must be preserved as economic cultural and political centers
