**Biohackers Magazine** , First impressions seem to always get the better of us Quick judgments about others ourselves and our communities never seem to cease making their presence known in our minds Psychologically these initial assumptions and impressions that our mind receives are tactics our mind uses as a means of survival sometimes aligning with our intuition to help us determine what or who is going to be helpful or harmful But we must be careful here Our mind is equipped to handle countless sensations and thoughts and due to this we sometimes get so bogged down by this demanding busy world that we take the easy way out and make a judgment based solely on superficial knowledge without any deeper reflection or analysis The world is fast paced and although our mind does well to keep up it needs to be able to consciously recognize that our health both individual and as human beings is dependent on the strive to understand oneself and the other with empathy and compassion COVID 19 has shed a new spotlight on the increasing mental health crisis that is facing our world and I believe that one of the main causes is careless thinking that leads to quick assumptions to save oneself the time of research and contemplation Don t let others think for you Yes respect those with the authority to offer professional opinions but don t be a follower be a student and learn from every experience When your health seems to suffer don t assume the worst When someone comes at you the wrong way don t write them off as a heartless soul When you have a tough interaction with someone representing another community don t assume that everyone else is like that Instead look for the best in yourself others and the community There is the power behind the phrase Love thy neighbor When we treat every person that we come across as our neighbor we break down the prideful barriers that

define what it means to be human The human person is a compositum of both mind and body Spiritual and Corporeal substance When biohacking ourselves let s remember to start with the intention of acting out of love for thyself of thy neighbor and of thy community There will always be disagreements between people but when we see the other person as our neighbor as another one of us so to speak we offer respect and extinguish any hatred and sinful intentions from the relationship thus creating a peaceful happier and more vibrant environment to foster a healthy mind that s prepared for whatever the onerous world throws at it

**Biohack Your Morning: Ice, Light and Silence** Maya Colton,2026-03-10 The first hour of the day is not neutral It is being shaped by something either by habit by default or by deliberate choice For a growing number of people that choice involves cold natural light and quiet Not as a performance of optimization but as a genuine attempt to begin the day from a more grounded place Biohack Your Morning explores what happens when three simple evidence informed practices are combined into a consistent morning ritual cold exposure that activates physical alertness natural light that anchors the body s internal clock and silence that allows the mind to settle before the noise begins It examines not just the physiological reasoning behind each practice but the interior experience of building a morning that actually belongs to you This book offers insight into why mornings so often feel reactive rather than intentional and how small deliberate interventions can quietly shift the emotional and mental tone of an entire day It reframes biohacking not as a pursuit of peak performance but as a return to the basic conditions under which a human being functions with more clarity steadiness and self awareness For anyone who has sensed that their mornings are running them rather than the other way around this book explores a simpler more honest approach to reclaiming that first hour
