Cohesion Jeffrey Lang,2005 While continuing their odyssey through the Delta Quadrant Captain Kathryn Janeway and the crew of the Voyager encounter a strange alien race that according to known physical laws should not exist but an expedition to the Monorhan homeworld hurtles the starship into a region beyond the fabric of space time and forces Seven of Nine and B Elanna Torres into an uneasy alliance if they are to survive Original **Star Trek: Voyager: String Theory #1:**

Cohesion Jeffrey Lang,2005-07-01 When Captain Janeway and her crew investigate a peculiar and dangerous anomaly tied to an alien civilization it sets in motion a chain of events bridging USS Voyager s past with its future Spirits unbroken by the failed promise of the USS Dauntless Captain Kathryn Janeway s indefatigable crew continues their odyssey of discovery through an enigmatic region of the Delta Quadrant encountering a system inhabited by a species that according to known physical laws shouldn t exist These unusual beings the Monorhans hover near the edge of extinction technology from the USS Voyager promises life Janeway compelled by the aliens plight dispatches Seven of Nine and Lieutenant B Elanna Torres to the Monorhan homeworld But an unexpected shock wave crashes the shuttle carrying Torres and Seven catapulting Voyager into a place beyond the fabric of space time As B Elanna and Seven wage an interpersonal war Voyager struggles to prevail on an extradimensional battleground against an indefinable enemy But fate has determined that one is inexorably linked to the other the insurmountable chasm separating Voyager from her lost crew members must be bridged or all will perish **String Theory Book One** Jeffrey Lang,2012-09-18 This is the first novel in an exciting 3 part odyssey marking

A Novel Defense of Scientific Realism Jarrett Leplin, 1997-08-07 Vigorous and controversial this book develops a sustained argument for a realist interpretation of science based on a new analysis of the concept of predictive novelty Identifying a form of success achieved in science the successful prediction of novel empirical results which can be explained only by attributing some measure of truth to the theories that yield it Jarrett Leplin demonstrates the incapacity of nonrealist accounts to accommodate novel success and constructs a deft realist explanation of novelty To test the applicability of novel success as a standard of warrant for theories Leplin examines current directions in theoretical physics fashioning a powerful critique of currently developing standards of evaluation Arguing that explanatory uniqueness warrants inference and exposing flaws in contending philosophical positions that sever explanatory power from epistemic justification Leplin holds that abductive or explanatory inference is as fundamental as enumerative or eliminative inference and contends that neither induction nor abduction can proceed without the other on pain of generating paradoxes Leplin's conception of novelty has two basic components an independence condition ensuring that a result novel for a theory have no essential role even indirectly in the theory's provenance and a uniqueness condition ensuring that no competing theory provides a basis for

predicting the same result Showing that alternative approaches to novelty fall short in both respects Leplin proceeds to a series of test cases engaging prominent scientific theories from nineteenth century accounts of light to modern cosmology in an effort to demonstrate the epistemological superiority of his view Ambitious and tightly argued A Novel Defense of Scientific Realism advances new positions on major topics in philosophy of science and offers a version of realism as original as it is compelling making it essential reading for philosophers of science epistemologists and scholars in science studies
