The After School:

The After-school Lives of Children Deborah Belle, 1999-03-01 Based on research about after school experiences and dilemmas conducted over a four year period with employed parents and their children this book draws on the stories these parents and children told often using their actual words to emphasize the wide variety of children s after school arrangements children s movement over time in and out of different arrangements and the importance to children of multiple facets of their after school arrangements not simply the presence or absence of an adult caretaker The book also emphasizes that children are not randomly assigned to after school arrangements Rather parents and children struggle to reach optimal solutions to what are often difficult child care dilemmas To understand these dilemmas and the diverse strategies that families adopt one must attend to the individual situations of children as family members understand them This book was written to contribute to the development of new family and work policies and practices by illuminating the difficulties families face and their consequences for children Written for psychologists sociologists and other social scientists who study families maternal employment child care or child development it will also be useful for parents educators community leaders and public policymakers concerned about the well being of children whose parents are employed **Education** ,1911

Arizona After 3PM. Afterschool Alliance, 2009 Each afternoon across the U S 15 million children more than a quarter of children are alone and unsupervised after school The parents of 18 million would enroll their children in an afterschool program if one were available These are some of the key findings from the nation s most in depth study of how America s children spend their afternoons America After 3PM was sponsored by the JCPenney Afterschool Fund The 2009 report conducted for the Afterschool Alliance surveyed nearly 30 000 households across the United States In Arizona 590 households were surveyed for this study This paper identifies Arizona s supply of and demand for afterschool programs as well as the major barriers to its program enrollment Funding for this state report was provided by the JCPenney Afterschool Fund For the main report America After 3PM The Most In Depth Study of How America s Children Spend Their Afternoons see ED506748 Afterschool Programs Afterschool Alliance, Washington, DC., 2006 The 21st century s information economy is creating more jobs that require not only a college education but also at least some expertise in the fields of science technology engineering and math collectively known as STEM Across the country schools and communities are finding that the hours after school are particularly conducive to project based activities where a wide variety of children can participate in the design construction investigation sense making and communication of science projects Additionally after school program connections to community organizations such as museums and science centers can change attitudes about math and science giving students from under represented communities opportunity to gain the necessary skills to compete in formal science classrooms Some after school programs are making headway giving students extra time to explore the STEM fields The report concludes that after school programs have proven to be effective supports for young people on a variety of fronts

including fostering healthy lifestyles preventing drop outs boosting student academic achievement and self esteem and helping young people find and develop their passions As the public and parents become more concerned about students falling behind in math and science they are realizing that the extra hours after school can be used to help young people keep up and excel It is noted however that after school programs alone can not make up all lost ground but that they can and should be part of a comprehensive approach to giving more young people a chance to discover an interest in STEM and an aptitude that could lead many to choose degrees and careers in emergent STEM fields Contains 19 endnotes
