The Age Of Power:

The Age of Power Carl J. Friedrich, 1957 *Air Power in the Age of Total War* John Buckley, 2006-05-09 Warfare in the first half of the 20th century was fundamentally and irrevocably altered by the birth and subsequent development of air power This work assesses the role of air power in changing the face of battle on land and sea Utilizing late 1990s research the author demonstrates that the phenomenon of air power was both a cause and a crucial accelerating factor contributing to the theory and practice of total war For instance the expansion of warfare to the homefront was a direct result of bombing and indirectly due to the extent of national economic mobilization required to support first rate air power status In addition the move away from the principle of total war with the onset of the Cold War and the replacement of air power by ICBMs is thoroughly examined This work should provide students of international history war studies defence and strategic studies with an insight into 20th century warfare **Air Power in the Age of Primacy** Phil Haun, Colin Jackson, Timothy Paul Schultz, Tim Schultz, 2021-12-16 Analyzes the effectiveness of post Cold War air wars in Bosnia Kosovo Afghanistan Iraq Lebanon Libya Yemen Syria and against terrorist groups **The Age of Power** Carl Joachim Friedrich, 1957 **The Age of Prediction** Igor Tulchinsky, Christopher E. Mason, 2023-08-22 The power of the ever increasing tools and algorithms for prediction and their paradoxical effects on risk The Age of Prediction is about two powerful and symbiotic trends the rapid development and use of artificial intelligence and big data to enhance prediction as well as the often paradoxical effects of these better predictions on our understanding of risk and the ways we live Beginning with dramatic advances in quantitative investing and precision medicine this book explores how predictive technology is quietly reshaping our world in fundamental ways from crime fighting and warfare to monitoring individual health and elections As prediction grows more robust it also alters the nature of the accompanying risk setting up unintended and unexpected consequences The Age of Prediction details how predictive certainties can bring about complacency or even an increase in risks genomic analysis might lead to healthier lifestyles or a GPS might encourage less attentive driving With greater predictability also comes a degree of mystery and the authors ask how narrower risks might affect markets insurance or risk tolerance generally Can we ever reduce risk to zero Should we even try This book lays an intriguing groundwork for answering these fundamental questions and maps out the latest tools and technologies that power these projections into the future sometimes using novel cross disciplinary tools to map out cancer growth people s medical risks and stock dynamics **The Age of Anne** Edward Ellis Morris, 1886 [Actuarial Modelling of Claim Counts](#) Michel Denuit, Xavier Marechal, Sandra Pitrebois, Jean-Francois Walhin, 2007-07-27 There are a wide range of variables for actuaries to consider when calculating a motorist s insurance premium such as age gender and type of vehicle Further to these factors motorists rates are subject to experience rating systems including credibility mechanisms and Bonus Malus systems BMSs Actuarial Modelling of Claim Counts presents a comprehensive treatment of the various experience rating systems and their relationships with risk classification The authors
