Smoking Kills Conrad Keating, 2016-07-05 At the end of the Second World War Britain had the highest incidence of lung cancer in the world For the first time lung cancer deaths exceeded those from tuberculosis and no one knew why On 30 September 1950 a young physician named Richard Doll concluded in a research paper that smoking cigarettes was a cause and an important cause of the rapidly increasing epidemic of lung cancer His historic and contentious finding marked the beginning of a life long crusade against premature death and the forces of Big Tobacco Born in 1912 Doll a natural patrician jettisoned his Establishment background and joined the Communist Party as a reaction to the anarchy and waste of capitalism in the 1930s He treated the blistered feet of the Jarrow Marchers served as a medical officer at the retreat to Dunkirk and became a true hero of the NHS A political revolutionary and an epidemiologist with a Darwinian heart of stone Doll fulfilled his early ambition to be a valuable member of society Doll steered a course through a minefield of medical and political controversy Opponents from the tobacco industry questioned his science while later critics from the environmental lobby attacked his alleged connections to the chemical industry An enigmatic individual Doll was feared and respected throughout a long and wide ranging scientific career which ended only with his death in 2005 In this authorised and groundbreaking biography Conrad Keating reveals a man whose life and work encapsulates much of the twentieth century Described by the British Medical Journal as perhaps Britain's most eminent doctor Doll ushered in a new era in medicine the intellectual ascendancy of medical statistics According to the Nobel laureate Sir Paul Nurse his work which may have prevented tens of millions of deaths transcends the boundaries of professional medicine into the global community of mankind A well crafted biography of Doll who single handedly saved millions of lives with his findings New Scientist As this fascinating and fair minded biography makes clear while Doll's political instincts were radical he was nevertheless a conservative scientist always cautious in causal inference Impressive and engaging International Journal of Epidemiology

The Neoconservative Revolution Murray Friedman, 2005 This book which will come as a surprise to many educated observers and historians suggests that Jews and Jewish intellectuals have played a considerable role in the development and shaping of modern American conservatism The focus is on the rise of a group of Jewish intellectuals and activists known as neoconservatives who began to impact on American public policy during the Cold War with the Soviet Union and most recently in the lead up to and invasion of Iraq It presents a portrait of the life and work of the original and small group of neocons including Irving Kristol Norman Podhoretz and Sidney Hook This group has grown into a new generation who operate as columnists in conservative think tanks like The Heritage and The American Enterprise
