## **The First Three Minutes:**

**The First Three Minutes** Steven Weinberg, 1993-08-18 A Nobel Prize winning physicist explains what happened at the very beginning of the universe and how we know in this popular science classic Our universe has been growing for nearly 14 billion years But almost everything about it from the elements that forged stars planets and lifeforms to the fundamental forces of physics can be traced back to what happened in just the first three minutes of its life In this book Nobel Laureate Steven Weinberg describes in wonderful detail what happened in these first three minutes It is an exhilarating journey that begins with the Planck Epoch the earliest period of time in the history of the universe and goes through Einstein's Theory of Relativity the Hubble Red Shift and the detection of the Cosmic Microwave Background These incredible discoveries all form the foundation for what we now understand as the standard model of the origin of the universe The First Three Minutes examines not only what this model looks like but also tells the exciting story of the bold thinkers who put it together Clearly and accessibly written The First Three Minutes is a modern day classic an unsurpassed explanation of where it is we really come from
