*Insights into Disciplinary Literacies* Ainara Imaz Agirre, Roberto Arias-Hermoso, 2026-01-13. Offers fresh perspectives on academic and disciplinary literacies across a range of contexts. This book presents empirical evidence of the academic and disciplinary literacies that learners engage with in educational contexts. The chapters focus on the languages of schooling in first, second, or foreign language contexts across primary, secondary, and higher education. The book is divided into two main sections. The first section focuses on students' voices and perceptions, providing new insights into the difficulties they encounter when developing academic or disciplinary literacies in different contexts and disciplines. The second section addresses students' academic or disciplinary literacy skills, both productive and receptive. The chapters include qualitative, quantitative, and mixed-method studies and provide valuable new insights across a range of educational contexts. *EU Focus*, 2005-05. From a scientific point of view, several challenges to renewable energy come from the intermittent nature of energy sources such as wind, solar, photovoltaic, and solar thermal. These problems are currently being addressed with research on power electronics, converters, storage systems, Artificial Intelligence techniques,

new materials and production technologies numerical analysis techniques among others This research endeavours to reduce costs and find alternative energy sources that are competitive with fossil fuels Consequently these efforts of the scientific community will contribute to improving the quality of life on the planet This book summarises ten years of contributions to these topics and contains a selection of the best papers presented at the International Conferences on Renewable Energy and Power Quality ICREPQ from 2003 to 2012 These contributions have been selected by a team of voluntary reviewers with two to four reviewers assigned to each paper At the end of this process only about 5% of all presented papers were selected Considering each paper had been reviewed before in order to be accepted for the conference the selected papers represent the best of the best The contributors to this book represent some of the leading authorities in their areas of expertise This book will be of particular interest to professional engineers and researchers dealing with renewable energy exploitation but will also prove useful to postgraduate level students In addition it can be used as a reference book for engineers physicists and mathematicians who are interested and involved in the operation project management design and analysis of renewable sources equipment
