the subject Communications Multimedia Internet New Technologies grade 1 0 course Media Professions and Society language English abstract This thesis is dedicated to accessibility laws voluntary guidelines and professional regulations and how they interact with web designers So the research question asks How do web accessibility laws and professional codes of ethics affect the web designer s profession and working life To answer this question the first part outlines the extent to which web design is a profession and how it has evolved In the second part the concept of accessibility disability and approaches to accessible design are discussed then the legal regulations and professional ethics are considered and finally accessible design in practice In the end a conclusion is drawn to summarise the findings and provide an outlook The World Health Organization estimates that about 6 to 10 out of every 100 people live with a disability It is estimated that a total of 135 million people in the European Region have a disability This number could increase in the coming years as the population ages WHO Regional Office for Europe All of these people will most likely face significant barriers when it comes to information and communication technologies ICTs such as poorly designed websites where graphics cannot be read by screen readers or information that can only be accessed with a mouse instead of also with a keyboard This is fatal at a time when information and communication technologies are becoming increasingly important in our everyday lives A so called digital divide between people with access to information and those without could emerge due to rapid technological progress This potential development makes accessibility such an important issue so that people with disabilities also have full and equal access to information Accessibility is not just about information It s about enabling people with disabilities to live empowered lives and participate in the online environment where engagement and participation in contemporary politics culture and media take place In that regard a change has been taking place since the last decades and disability is more and more recognised as an important part of society of the public and private sphere and daily life

Niklas Sowa,Hannes Beer,2015-01-26 Seminar paper from the year 2014 in the subject Business economics Business Management Corporate Governance grade 1.0 Humboldt University of Berlin language English abstract In recent years one could observe a trend in global norm setting processes towards an increased participation and influence of non governmental organizations and private enterprises Cutler et al 1999 Scherer et al 2006 This increasing international political influence of private organizations is caused by a decreasing political influence of territorially limited governmental law and intergovernmental organizations due to more complex and mobile business environments Zörn 1998 Scherer et al 2006 The collaboration of private actors is oftentimes related to the development and implementation of social and environmental standards for business processes Scherer Smid 2000 The apparel and textile industry with its complex and multi branched supply chain is one of the industries where non governmental actors are comprehensively involved in the development of initiatives to improve working conditions and reduce environmental pollution In this context especially ethical labelling initiatives which certify participating producers and their products with a product label are of relevance In the present seminar paper we will present three ethical labelling initiatives from the apparel sector the Fair Wear Foundation FWF the Fairtrade Certified Cotton FCC and the Global Organic Textile Standard GOTS and study the effectiveness of these private governance initiatives *Ethical Luxury - Myth or Trend?* Saskia Scheibel,2011-06-15 Essay from the year 2010 in the subject Business economics Business Ethics Corporate

Ethics grade Distinction *Financial Accounting, Google eBook* John Hoggett, John Medlin, Lew Edwards, Matthew Tilling, Evelyn Hogg, 2012-02-02 Accounting has long been the benchmark by which all other introductory accounting textbooks are measured. It is well known as a comprehensive authoritative and reliable textbook that has supported students studying introductory accounting for over 20 years. The clarity of explanation and thorough illustration of the accounting process supports learning and prepares students for future study in commerce and beyond into professional practice. The new edition is ideally suited to accounting and non-accounting majors alike, illustrating accounting procedures and applying accounting information to business and business decision making. Accordingly, changes required under accounting standards and the regulatory environment as a consequence of International Accounting Standards Board (IASB) initiatives and the Conceptual Framework in Financial Reporting have been thoroughly updated in line with recent changes to AIFRS and the Framework. The four-colour design provides students with a more reader-friendly text, enhancing their understanding of concepts and ensuring learning outcomes are achieved. The text builds on the thorough and reliable explanation of the accounting process through the addition of new 'Link to business' chapter vignettes that apply the principles to practice. Previous editions were renowned for the number of exercises and problems, and the new edition builds upon this superior teaching feature. The end-of-chapter activities encourage the development of skills in decision making, critical thinking, ethical thinking, analysis and communication, building student confidence for success in their course. *Keep the Balance right - Ethical issues and the view to quarantine during the SARS outbreak* Kirsten Hermes, 2008-08-29 Research Paper postgraduate from the year 2007 in the subject Health Miscellaneous grade Hamburg University of Applied Sciences Life Sciences language English abstract INFORMATION This issue is in fact a final report NOT A DRAFT Decision making in public health crises is associated with a high potential for ethical conflicts, especially in restricting liberty measures such as quarantine. An effective and acceptable public health coping has the dual role of monitoring compliance and providing support to people in quarantine. The global 2003 nonmedical response to severe acute respiratory syndrome (SARS) and experiences in various states like China, Vietnam, Singapore or Canada with large-scale quarantine raised ethical questions in seeking the right balance between the tension of protecting the public's health and human rights and human needs. The loss of liberty, privacy and free movement as well as experienced psychosocial harm like fear, discrimination and stigmatization were described as collateral damage but found problematic also for further successful voluntary compliance. Ethical coaching across cultures Alexandra Mietusch, 2010-05-04 Essay from the year 2010 in the subject Business Economics Business Management Corporate Governance grade 1.0 European University Viadrina Frankfurt/Oder Kulturwissenschaft course ethical aspects of intercultural management language English abstract The development of ethical values in economy and society is the main condition of business preservation of competitiveness and economic efficiency in post-industrial and global contexts. As Gerhard Winter states in *Handbuch Interkulturelle Kommunikation und Kooperation* there are three main

reasons Firstly the increasing importance of the human as whole personality for the succeeding accomplishment of current changes and sustainable business success Secondly the lack of universal obligatory national and international values as the basis of healthy corporate culture and successful intercultural management And thirdly the compensation of global economic and social political conditions by voluntary self commitment to avoid extreme regulations and control and to secure business liberty Coaching as a type of counselling is in fashion Personal and life executive or leadership and business coaching are just a few genres in its practice The history of coaching began in sports and was taken over in the 1980 s by business and slowly has found its utilization in the private area of life But still dominant is its usage in the field of business and management Hence it appears important to take a closer look at the tool Coaching Does the use of coaching really works in various settings especially in intercultural management Do its ethical demands match with the routine of organizations and their managements May coaching have an effect on ethics in intercultural management

Ethical Evaluation of Manipulated Photos in News Luise Knah, 2011-09-27 Essay from the year 2011 in the subject Law Media Multimedia Law Copyright grade 1 2 University of New South Wales Sydney language English abstract Historically photographs are considered to deliver an accurate description of a shown event as a snapshot of time 1 With digital technology and image alteration programs like Photoshop this natural assumption has changed Nowadays every amateur is able to manipulate pictures and a lot of publications use the technology to enhance their photos The question if photo manipulation is ethical in general is very broad and depends on the situation The ethical evaluation in this essay focuses on the problematic application in news rooms Even the slightest alterations can be considered as a violation of the truthful reportage of an event that has taken place News organisations act by self regulating policies and are not restricted by law regarding photo manipulation including those in Australia The industry standard is to allow the enhancement of photographs for clarity and definition but altering the composition is to be frowned upon 2 Journalists have to be cautious about their actions because faked pictures jeopardize their own reputation as well as the credibility of the publication Cropping out irrelevant details is a legitimate and well known practise not only in news but also in fashion advertisement or even personal photography The challenge is to evaluate the shift in the perception of the viewer

Ethical problems concerning organ transplantation in "21 Grams" Stefan Hinterholzer,2008-09-03 Seminar paper from the year 2008 in the subject American Studies Miscellaneous grade 2 University of Innsbruck Department of American Studies course Ethical Issues in American Medical and Legal Narratives language English abstract How many lives do we live How many times do we die They say we all lose 21 grams at the exact moment of our death Everyone And how much fits into 21 grams How much is lost When do we lose 21 grams How much goes with them How much is gained How much is gained Twenty one grams The weight of a stack of five nickels The weight of a hummingbird A chocolate bar How much did 21 grams Paul Rivers leaves us with all these questions before he dies and in fact we need all these questions in order to

reach a deeper understanding and to make sense of the movie So how much do 21 grams weigh And what are these 21 grams It is tempting to give a relatively simple answer from a medical or religious perspective We may say that gases exhaust from our body or even that the soul escapes from the body when we die But this movie goes a step further These 21 grams apparently weigh so little but in the end weigh a lot These 21 grams are the happiness of a family the target of revenge the reason for struggle they are life itself So our lives are dependent on these 21 grams which shows that life is really fragile And this leads us to the topic of this paper organ transplantation Organ transplantation gives us the possibility to save another person's life when our life is already over For many people it is self evident to donate an organ when someone else's life can be saved through that and it may seem that there are no real problems or questions concerning organ transplantation but there are Organ transplantation is a much more controversial issue as most people might believe and there are definitely a number of ethical problems concerning organ transplantation The aim of this paper is to analyze Alejandro González Iñárritu's movie 21 Grams and to describe the problems and questions connected with organ transplantation that come up In order to provide a solid basis for the analysis necessary background information will be presented and connected with the movie First of all the director will be presented briefly Then general questions and problems concerning organ transplantation in 21 Grams will be discussed and finally more complex issues decision making psychological problems and interest groups will be dealt with
