## The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it is designed for the people.

Before making any significant decisions or investments, it is important to understand the preferences, needs, and expectations of the employees, their families, and the organization as a whole. This includes understanding the needs of all employees and their families.

The way to build a hybrid work model is to first understand the needs of all employees and their families, and then design the model to meet those needs.

How do you design a hybrid work model that meets the needs of all employees and their families? The answer is to design a model that is flexible, scalable, and sustainable. This means that the model can be adjusted to meet the needs of different employees and their families, and that it can be scaled up or down as needed. Finally, the model must be sustainable, meaning that it can be maintained over the long term.
