**The Johnstown Flood** Herman Dieck,2010-11      [The Johnstown Flood, 1889](#) Daniel Leathers,2020-02-04 Gertrude Quinn was only six years old when her world was changed forever In a matter of minutes she and thousands of other people in Johnstown Pennsylvania found themselves fighting for their lives in swirling water that covered their city Gertrude Quinn was one of the lucky ones She survived the great Johnstown Flood of 1889 More than 2 200 other people were not as lucky They died in one of the worst natural disasters in the History of the United States Even though more than 120 years have passed since this disaster we can still learn important lessons from the Johnstown Flood In this book you will find out how the South Fork Dam and heavy rainfall worked together to cause the flood You will understand the flood better through the stories of people who survived and see how the nation helped to rebuild the town      *Johnstown Flood* David McCullough,2007-05-31 The stunning story of one of America s great disasters a preventable tragedy of Gilded Age America brilliantly told by master historian David McCullough At the end of the nineteenth century Johnstown Pennsylvania was a booming coal and steel town filled with hardworking families striving for a piece of the nation s burgeoning industrial prosperity In the mountains above Johnstown an old earth dam had been hastily rebuilt to create a lake for an exclusive summer resort patronized by the tycoons of that same industrial prosperity among them Andrew Carnegie Henry Clay Frick and Andrew Mellon Despite repeated warnings of possible danger nothing was done about the dam Then came May 31 1889 when the dam burst sending a wall of water thundering down the mountain smashing through Johnstown and killing more than 2 000 people It was a tragedy that became a national scandal Graced by David McCullough s remarkable gift for writing richly textured sympathetic social history *The Johnstown Flood* is an absorbing classic portrait of life in nineteenth century America of overweening confidence of energy and of tragedy It also offers a powerful historical lesson for our century and all times the danger of assuming that because people are in positions of responsibility they are necessarily behaving responsibly

*History of the Johnstown Flood ... With Full Accounts Also of the Destruction on* Willis Fletcher Johnson,2016-09-03 Willis Fletcher Johnson 1857 March 29 1931 was an author lecturer and for twenty years foreign and diplomatic editorial writer for *The New York Tribune* The Johnstown Flood locally the Great Flood of 1889 occurred on May 31 1889 after the catastrophic failure of the South Fork Dam on the Little Conemaugh River 14 miles 23 km upstream of the town of Johnstown Pennsylvania The dam broke after several days of extremely heavy rainfall unleashing 20 million tons of water 18 million cubic meters from the reservoir known as Lake Conemaugh With a volumetric flow rate that temporarily equalled that of the Mississippi River the flood killed 2 209 people and caused US 17 million of damage about 450 million in 2015 dollars The American Red Cross led by Clara Barton and with 50 volunteers undertook a major disaster relief effort Support for victims came from all over the United States and 18 foreign countries After the flood survivors suffered a series of legal defeats in their attempts to recover damages from the dam s owners Public indignation at that failure prompted the development in

American law changing a fault based regime to strict liability History The village of Johnstown was founded in 1800 by the Swiss immigrant Joseph Johns anglicized from Schantz where the Stony Creek and Little Conemaugh rivers joined to form the Conemaugh River It began to prosper with the building of the Pennsylvania Main Line Canal in 1836 and the construction in the 1850s of the Pennsylvania Railroad and the Cambria Iron Works By 1889 Johnstown s industries had attracted numerous Welsh and German immigrants With a population of 30 000 it was a growing industrial community known for the quality of its steel The high steep hills of the narrow Conemaugh Valley and the Allegheny Mountains range to the east kept development close to the riverfront areas The valley had large amounts of runoff from rain and snowfall The area surrounding Johnstown is prone to flooding due to its location on the rivers whose upstream watersheds include an extensive drainage basin of the Allegheny plateau Adding to these factors slag from the iron furnaces of the steel mills was dumped along the river to create more land for building 6 Developers artificial narrowing of the riverbed to maximize early industries left the city even more flood prone The Conemaugh River immediately downstream of Johnstown is hemmed in by steep mountainsides for about 10 miles 16 km Today a plaque at the scenic overlook on Pennsylvania Route 56 about 4 miles 6 km outside Johnstown cites this gorge as the deepest river gap in the United States east of the Rocky Mountains

**Johnstown Flood of 1889** Rachel A. Koestler-Grack,2008 On May 31 1889 the people of Johnstown Pennsylvania got the surprise of the century one that claimed the lives of more than 2 200 men women and children In the mountains that overlooked the booming coal and steel town the restless waters of Lake Conemaugh churned behind the South Fork Dam a hastily built earthen structure The soft rain that had been falling that afternoon took an angry turn filling the belly of Lake Conemaugh over capacity In a matter of hours the lake began spilling over the top and ultimately burst its earthen restraints Like a roaring hurricane 20 million tons of water cascaded down the Conemaugh Valley stripping the landscape raw and eating up any scrap of life in its path Lake Conemaugh s final destination was Johnstown where its effects are still felt by the people who live there The horrible tragedy of the Johnstown Flood quickly turned into one of the nation s hottest scandals and taught a powerful lesson to the people of the Conemaugh Valley P 4 of Cover

**The Johnstown Flood** Willis Johnson,2015-03-10 The summer of 1889 will ever be memorable for its appalling disasters by flood and flame In that period fell the heaviest blow of the nineteenth century a blow scarcely paralleled in the histories of civilized lands Central Pennsylvania a center of industry thrift and comfort was desolated by floods unprecedented in the records of the great waters On both sides of the Alleghenies these ravages were felt in terrific power but on the western slope their terrors were infinitely multiplied by the bursting of the South Fork Reservoir letting out millions of tons of water which rushing madly down the rapid descent of the Conemaugh Valley washed out all its busy villages and hurled itself in a deadly torrent on the happy borough of Johnstown The frightful aggravations which followed the coming of this torrent have waked the deepest sympathies of this nation and of the world and the history is demanded in permanent form for those of the present day and

for the generations to come This is a new edition of THE JOHNSTOWN FLOOD by Willis Johnson including all the appalling record the breaking of the south fork dam the sweeping out of the Conemaugh valley the over throw of Johnstown the massing of the wreck at the railroad bridge escapes rescues searches for survivors and the dead relief organizations stupendous charities with full accounts also of the destruction on the Susquehanna and Juniata rivers and the Bald Eagle creek This edition has all new photos a linked table of contents for both chapters and illustrations and any typographical errors that appeared in the original edition have been corrected

[The Johnstown Flood of 1889](#) Charles River Charles River Editors,2018-02-19 Includes pictures Includes accounts of the flood written by survivors Includes a bibliography for further reading The deluge released by the dam s collapse carried more than 12 000 cubic meters of debris filled water each second Flow rates in the Mississippi River typically vary between 7 000 and 20 000 cubic meters per second Sid Perkins Science News Vol 176 In 2005 the world watched in horror as Hurricane Katrina decimated New Orleans and the calamity seemed all the worse because many felt that technology had advanced far enough to prevent such tragedies whether through advanced warning or engineering However the failure of human engineering like that seen in New Orleans was nothing new and it had previously had even deadlier consequences in Johnstown Pennsylvania Although floods rarely get as much coverage as other kinds of natural disasters like volcanic explosions the Johnstown Flood of 1889 has remained an exception due to the sheer destruction and magnitude of the disaster On May 31 1889 Johnstown became a casualty of a combination of heavy rains and the failure of the South Fork Dam to stem the rising water levels of Lake Conemaugh about 15 miles away The dam s inability to contain the water and its subsequent collapse resulted in a catastrophic flood that swept through the town with virtually no warning With water flowing at a rate equivalent to the Mississippi River a tide of water and debris 60 feet high and traveling 40 miles per hour in some places surged through Johnstown and swept away people and property alike The flood ultimately resulted in the deaths of over 2 000 people and destroyed thousands of buildings wreaking damages estimated to be the equivalent of nearly half a billion dollars today In 1889 the Johnstown Flood was the deadliest natural disaster in American history and though it was later surpassed by other events the unprecedented nature of the flood led to relief efforts never before seen including by the Red Cross The Johnstown Flood also led to a change in laws as people tried and failed to recoup damages caused by the collapse of the dam and the subsequent flood The Johnstown Flood of 1889 chronicles the story America s deadliest natural disaster during the 19th century Along with pictures of important people places and events you will learn about the Johnstown Flood like never before in no time at all
