## **The Kalam Cosmological Argument:**

**Kalam Cosmological Argument** William Lane Craig, 1979-06-17      **The Kalam Cosmological Argument, Volume 1** Paul Copan, William Lane Craig, 2017-11-16 Did the universe begin to exist? If so, did it have a cause? Or could it have come into existence uncaused from nothing? These questions are taken up by the medieval though recently revived kalam cosmological argument which has arguably been the most discussed philosophical argument for God's existence in recent decades. The kalam's line of reasoning maintains that the series of past events cannot be infinite but rather is finite. Since the universe could not have come into being uncaused, there must be a transcendent cause of the universe's beginning—a conclusion supportive of theism. This anthology on the philosophical arguments for the finitude of the past asks: Is an infinite series of past events metaphysically possible? Should actual infinities be restricted to theoretical mathematics, or can an actual infinite exist in the concrete world? These essays by kalam proponents and detractors engage in lively debate about the nature of infinity and its conundrums about frequently used kalam argument paradoxes of Tristram Shandy, the Grim Reaper, and Hilbert's Hotel, and about the infinity of the future.

**The Kalām Cosmological Argument** Paul Copan, William Lane Craig, 2017 Pt 1: Whatever begins to exist has a cause. pt 2: The universe began to exist.      *On The "Kalam" Cosmological Argument* Michael Rasmussen, 2009

**The Kalam Cosmological Argument, Volume 2** Paul Copan, William Lane Craig, 2017-11-16 The ancient kalam cosmological argument maintains that the series of past events is finite and that therefore the universe began to exist. Two recent scientific discoveries have yielded plausible prima facie physical evidence for the beginning of the universe. The expansion of the universe points to its beginning to a Big Bang as one retraces the universe's expansion in time. And the second law of thermodynamics, which implies that the universe's energy is progressively degrading, suggests that the universe began with an initial low entropy condition. The kalam cosmological argument, perhaps the most discussed philosophical argument for God's existence in recent decades, maintains that whatever begins to exist must have a cause. And since the universe began to exist, there must be a transcendent cause of its beginning—a conclusion which is confirmatory of theism. So this medieval argument for the finitude of the past has received fresh wind in its sails from recent scientific discoveries. This collection reviews and assesses the merits of the latest scientific evidences for the universe's beginning. It ends with the kalam argument's conclusion that the universe has a cause—a personal cause with properties of theological significance.

*A Defense of the Kalam Cosmological Argument and the B-theory of Time* Curtis John Metcalfe, 2013 William Lane Craig is the most recognizable contemporary defender of the kalam cosmological argument. The argument in its simplest form is that: i) Whatever begins to exist has a cause of its existence; ii) The universe began to exist; and iii) Therefore the universe has a cause of its existence. In defending this argument, he claims that it presupposes the theory of time commonly referred to as the A theory of time, which is roughly the view that time really does flow from the nonexistent future into the present and then out of existence into the past. Though this may be the commonsense view of time

it is not the view held by many philosophers and physicists Because Craig s argument relies on a controversial view of time the argument in my view carries an unnecessary burden of proof on behalf of the A theory My thesis then is to argue in support of the kalam cosmological argument but also to argue against Craig s claim that it must be dependent on the A theory of time the result of which will be a more general yet stronger version of the kalam cosmological argument for the existence of God

The Kalām Cosmological Argument William Lane Craig,1979-01-01

The Kalām Cosmological Argument: A Reassessment Jacobus Erasmus,2018-01-08 This book offers a discussion of the kal m cosmological argument and presents a defence of a version of that argument after critically evaluating three of the most important versions of the argument It argues that since the versions of the kal m cosmological argument defended by Philoponus c 490 c 570 al Ghaz l 1058 1111 and the contemporary philosopher William Lane Craig all deny the possibility of the existence of an actual infinite these arguments are incompatible with Platonism and the view that God foreknows an endless future This conclusion however is not a problem for the proponents of the kal m cosmological argument for the book shows how the argument can be defended without denying the possibility of the actual infinite In order to offer a comprehensive analysis of Philoponus and al Ghaz l s cosmological arguments the book draws on recent English translations of some of their works Next the book advances a detailed argument against the popular argument based on the impossibility of an actual infinite Finally the book offers a unique defence of the kal m cosmological argument by defending philosophical arguments for a beginning of time that do not deny the actual infinite evaluating which hypothesis best explains the discoveries of modern cosmology and offering an argument in support of the premise that if the universe came into existence then God brought it into existence

Five Views on Apologetics Zondervan,2010-06-01 Of the most common approaches to apologetics which is most effective The goal of apologetics is to persuasively defend Christianity against charges of falsehood inconsistency or credulity It s an intellectual discipline that serves to bolster the faith of Christian believers and to aid the task of evangelism but are some methods more effective than others Five Views on Apologetics examines the how to of apologetics putting five prominent techniques under the microscope Classical represented by William Lane Craig Evidential represented by Gary Habermas Cumulative Case represented by Paul D Feinberg Presuppositional represented by John M Frame Reformed Epistemology represented by Kelly James Clark Offering a forum for presentation critique and defense this book allows the contributors for the different viewpoints to respond to the others Your own informed conclusions can then guide you as you meet the questions of a needy world with the claims of the gospel The Counterpoints series presents a comparison and critique of scholarly views on topics important to Christians that are both fair minded and respectful of the biblical text Each volume is a one stop reference that allows readers to evaluate the different positions on a specific issue and form their own educated opinion

**On The Kalam Cosmological Argument** Michael Rasmussen,2009

**The Kalam Cosmological Argument for God** Mark R. Nowacki,2007 Approximately 1500 years ago John Philoponus proposed a simple and compelling argument

for the existence of God 1 Whatever comes to be has a cause of its coming to be 2 The universe came to be 3 Therefore the universe has a cause of its coming to be Due to the influence of William Lane Craig analytic philosopher Christian apologist champion of Philoponus s position and author of The Kalam Cosmological Argument this argument and the family of subarguments that support it have come to be known as the Kalam Cosmological Argument KCA The term kalam comes from Medieval Arabic philosophy and broadly means natural theology or philosophical theism Despite being one of the most widely discussed and hotly debated arguments in philosophy today it has been more than twenty five years since any systematic presentation of the argument as a whole has been attempted The present book helps remedy that situation laying bare the logical structure of the KCA as it has emerged from continuous philosophical refinement A handy taxonomy of major objections and replies to the KCA has been included as an aid to understanding the argument and its background literature This book breaks new ground by arguing that future progress on the KCA requires that the argument be situated within a substance based metaphysics In addition to providing an analytic account of substances this book describes a modal theory sensitive to the possibilities and necessities that obtain for substances With these conceptual tools the characteristic thought experiments supporting the KCA can be properly assessed

**Did God Create the Universe from Nothing?** Jonathan Ms Pearce,2016-09-15 The Kalam Cosmological Argument is favoured by Christian apologists to argue that God must have created the universe This latest book by philosopher Jonathan MS Pearce takes that argument to task and finds it seriously lacking despite its common appeal This is a must have counter to the well worn religious argument

Consciousness Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration *Cosmology Without God?* David Alcalde, 2019-06-26 Is God a superfluous hypothesis for

modern cosmology According to the normal understanding of modern science the answer should be affirmative because modern science is supposed to be free of metaphysical and theological presuppositions However despite its self proclaimed neutrality regarding metaphysics and theology modern science is full of metaphysical and theological presuppositions These can be summarized as a mechanistic understanding of nature a reduction of God to an external agent in competition with natural processes and creation to a worldly mechanism These presuppositions are deficient and untenable and they remain unconscious for the most part in the dialogue between science and theology making it intellectually impossible because of the reduced notions of God nature and creation assumed Using the coherent and unreduced image of God and nature provided by the Christian doctrine of creation ex nihilo Fr David Alcalde intends to uncover and criticize the incoherent

theological assumptions inherent in a concrete branch of modern science which is modern cosmology The author points out the presence of these inadequate theological presuppositions in both the theologians who use modern cosmology to offer scientific proof for the existence of God and the atheistic cosmologists who use their science to reject the idea of God
