Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as *Light The Shape of Space*      *Creating Games with Unity and Maya* Adam Watkins,2012-10-12 Unity brings you ever closer to the author once deploy anywhere dream With its multiplatform capabilities you can target desktop web mobile devices and consoles using a single development engine Little wonder that Unity has quickly become the 1 game engine out there Mastering Unity is absolutely essential in an increasingly competitive games market where agility is expected yet until now practical tutorials were nearly impossible to find *Creating Games with Unity and Maya* gives you with an end to end solution for Unity game development with Maya Written by a twelve year veteran of the 3D animation and games industry and professor of 3D animation this book takes you step by step through the process of developing an entire game from scratch including coding art production and deployment This accessible guide provides a non programmer entry point to the world of game creation Aspiring developers with little or no coding experience will learn character development in Maya scripts GUI interface and first and third person interactions      *Philosophical Transactions of the Royal Society of London* ,1898
