outside the medical mainstream the book also highlights how many widely accepted therapeutic treatments of the past for example the water cure hydrotherapy or lobotomy psychosurgery fell out of favor and were quickly forgotten Besides examining popular healing techniques the book also explores the changing nature of the medical marketplace and how once standard treatments e g leeching psychoanalysis have had their ups and downs The book comprises five chronological sections covering time periods from pre 1900 to the present Unemployment's Shocking Truth Jack Stone, 2008-06-03

About the Book This book does not take a neutral stand on the issue of mass unemployment It is an effort to expose capitalism s most outrageous feature its compulsive need to use unemployment and the fear of unemployment to ensure the docility and subservience of its workers Under the capitalist system the stick of the fear of unemployment is necessary to keep workers noses to the grindstone and make them perform to the satisfaction of their employers The stick is needed because much work is boring the carrot paid is less than a living wage provides workers very little or no control over the work process and stifles creativity in short because the total carrot offered to numerous workers is so woefully inadequate Under a different system one in which working people participated fully in the decisions affecting what how and for what purpose goods and services were produced if we had a system based on economic democracy there would be no need to use the stick of the fear of unemployment The creativity of most of the millions of working people now mostly dormant would be awakened and the volume and quality of improvements and inventions especially in housing energy transit systems and health care would be so great as to tower high above and completely overshadow the number and purpose of the innovations created under the present system The issue of unemployment is shrouded in half truths and outright lies As a result there is almost total ignorance about the real causes of unemployment and worse still about its very serious consequences Many claim that there are enough jobs but that the unemployed are lazy and would rather be on welfare While this may be true of a very small fraction of the unemployed it is not true of the overwhelming majority There have been numerous instances in which whenever advertisements calling for applicants for relatively well paid jobs or for jobs that paid better than the minimum wage the number of applicants that applied for those jobs were ten or more times greater than the number of jobs that were advertised In September 26th of 1984 to mention just one instance the Associated Press News Agency reported that 50 000 people lined up for 350 jobs The report went on to say that the applicants some of whom waited in line for two days hope to land a longshoreman s job paying 15 45 an hour or a marine clerk s job earning 17 45 an hour However the fact that only 350 jobs are currently available didn t dismay the crowd which queued up in a line in the San Pedro district of Los Angeles that stretched for 13 mile Clearly the majority would rather have gainful employment at a living wage and live a life of dignity and integrity Furthermore apart from the simple need to earn a living productive employment is an indispensable part of the psychological makeup of human beings Simply put people want to feel useful Prolonged joblessness is a serious threat to a person s self esteem and destroying that self esteem has appalling consequences The ugly truth is that the system

under which we live will not or cannot provide jobs for those who need them The business class is simply not interested in full employment because mass unemployment provides them with many benefits Among those benefits a large pool of unemployed workers drives down the wages employers have to pay **The Portal of Dreams** Charles Neville Buck,1912
