**The Unions** Marten S. Estey,1976-01-01     The Unions R. A. Gangolli,1967     The Unions Marten S. Estey,1967

*The Unions. Structure, development, and management. Under the general editorship of L.R. Sayles ,1967*     The Economics of Trade Unions: New Directions J.J. Rosa,2013-04-17 The crisis in trade unionism is now a prevailing concern in the United States as well as in Europe Its main symptom is of course the decrease in union membership Still other less observable elements account for the concern namely the obsolescence of discourse the decrease of militant motivation and the question of efficiency of strikes or collective bargaining One must keep in mind however that trade unions will evolve differently from one country to another What we know about trade unions has changed over the years We can now more accurately assess the effects of union action especially with regard to labor market wages and productivity This book adds to the assessment by integrating the new theories of organizations contracts and property rights In doing so we shift from a study of markets to one of hierarchies Thus the current literature comes back to its sources but with improved analytical instruments by returning to the Ross Dunlop debate on the nature of the trade union This more complex outlook of trade unions as an organization not only as an abstract or bodyless supplier of monopolistic labor allows one to understand better the apparent differences between unions mainly American whose action is oriented towards work relation ships and labor contract management and unions European or Latin who are closer to a pressure group wielding power on the political front

**The Global Historical and Contemporary Impacts of Voluntary Membership Associations on Human Societies** David Horton Smith,2018-07-17 Reviewed here is global research on how 13 types of Voluntary Membership Associations MAs have significantly or substantially had global impacts on human history societies and life Such outcomes have occurred especially in the past 200 years since the Industrial Revolution circa 1800 CE and its accompanying Organizational Revolution Emphasized are longer term historical and societal or multinational impacts of MAs rather than more micro level individual or meso level organizational outcomes MAs are distinctively structured with power coming from the membership not top down The author has characterized MAs as the

dark matter of the nonprofit third sector using an astrophysical metaphor Astrophysicists have shown that most physical matter in the universe is dark in the sense of being unseen not stars or planets

*The System of Industrial Relations in Canada* Alton Westwood Joseph Craig,1990

*Parties, Trade Unions and Society in East-Central Europe* Michael Waller,Martin Myant,2022-12-30 Originally published in 1994 this volume analyses the relationship between political parties and trade unions in Poland the Czech Republic Slovakia Hungary and Bulgaria Political parties had high visibility in the changes that took place in Eastern Europe during the 1980s and early 1990s Far less visible were the developments in the trade union sphere where the old mass organizations of the communist period now independent were joined by newly formed organizations and both played a central role in politics

**Research and Development Management: From the Soviet Union to Russia** Christoph M. Schneider,2013-11-11 In the past intensive interest in Soviet research and development has been sporadic both in the West and in the USSR The end of the 1980s coincided with the demise of the Soviet model of economic development As a result a surge of attention has been given to the factors driving the motor of Soviet growth and development as well as R D The opening first of the Soviet and subsequently of the Russian economy finally exposed it to global scientific standards The long period of international isolation with respect and technological exchanges made it difficult for scholars and policy makers at home and abroad to measure the status of Soviet advances Consequently some overrated the levels while others underestimated them Now it comes to light that although the Soviets put the first satellite in space Sputnik and developed their own hydrogen bomb these were more the exceptions of innovation from research results rather than the rule Therefore as the management of the entire economy increasingly malfunctioned so did the management of R D in contributing to economic growth and development There is no denying the incredible investment of the former Soviet state in domestic science and research The R D community was one of the largest if not the largest in the world during the second half of the twentieth century Now Russia has inherited not only this enormous resource but also the inadequate organization management and structure
