RICHELSON,2019-06-14 **Transforming U.S. Intelligence** Jennifer E. Sims,Burton Gerber,2005-08-24 The intelligence failures exposed by the events of 9 11 and the missing weapons of mass destruction in Iraq have made one thing perfectly clear change is needed in how the U S intelligence community operates Transforming U S Intelligence argues that transforming intelligence requires as much a look to the future as to the past and a focus more on the art and practice of intelligence rather than on its bureaucratic arrangements In fact while the recent restructuring including the creation of the Department of Homeland Security may solve some problems it has also created new ones The

authors of this volume agree that transforming policies and practices will be the most effective way to tackle future challenges facing the nation's security. This volume's contributors, who have served in intelligence agencies, the Departments of State or Defense, and the staffs of congressional oversight committees, bring their experience as insiders to bear in thoughtful and thought-provoking essays that address what such an overhaul of the system will require. In the first section, contributors discuss twenty-first-century security challenges and how the intelligence community can successfully defend U.S. national interests. The second section focuses on new technologies and modified policies that can increase the effectiveness of intelligence gathering and analysis. Finally, contributors consider management procedures that ensure the implementation of enhanced capabilities in practice. **Transforming U.S. Intelligence** supports the mandate of the new director of national intelligence by offering both careful analysis of existing strengths and weaknesses in U.S. intelligence and specific recommendations on how to fix its problems without harming its strengths. These recommendations, based on intimate knowledge of the way U.S. intelligence actually works, include suggestions for the creative mixing of technologies with new missions to bring about the transformation of U.S. intelligence without incurring unnecessary harm or expense. The goal is the creation of an intelligence community that can rapidly respond to developments in international politics, such as the emergence of nimble terrorist networks, while reconciling national security requirements with the rights and liberties of American citizens.

Intelligence Information Richard A. Best, Jr., 2011-07-06 Unauthorized disclosures of classified intelligence are seen as doing significant damage to U.S. security. This is the case whether information is disclosed to a foreign government or published on the Internet. On the other hand, if intelligence is not made available to government officials who need it to do their jobs, enormous expenditures on collection, analysis, and dissemination are wasted. These conflicting concerns require careful and difficult balancing. Investigations of the 9/11 attacks concluded that both technical and policy barriers had limited sharing of information collected by different agencies that, if viewed together, could have provided useful insight into the unfolding plot. A consensus emerged that U.S. intelligence agencies should share information more widely in order that analysts could integrate clues acquired by different agencies in order to connect the dots. This report focuses on information acquired, analyzed, and disseminated by agencies of the U.S. Intelligence Community, but these concerns also affect classified information outside the Intelligence Community.
