U S Military Power:

The Future Roles of U.S. Military Power and Their Implications William Thomas Johnsen, 1997 As the daily headlines attest the Department of Defense is in the midst of a Quadrennial Defense Review QDR Charged by Congress the Department of Defense is examining a broad range of issues concerning U S military policy and strategy inter alia future national defense strategy the force structure necessary to implement that strategy the affects of technology on force structure and the anticipated roles and missions of the Reserve Components in executing the defense strategy that will have far reaching consequences for the United States Before these crucial issues are addressed however a more fundamental question needs to be explored what does the United States want its military to do In other words what are the future roles of the U S military Only after this issue has been answered can the Department of Defense turn to the other important issues posed by Congress Dr William T Johnsen tackles this question In brief he concludes that the U S military will continue to perform its traditional roles deterrence reassurance compellence and support to the nation The method and manner of carrying out those roles however will change in some cases substantially The implications of these adapted roles will be considerable More importantly Dr Johnsen also examines the emerging role of preventive defense and its potentially profound consequences for the U S military The debates carried out within and about the QDR will shape the security policy of the United States well into the 21st Century

U.S. Military Power Steven L. Rys, 1983

Short of General War Harry Richard
 Yarger, Army War College (U.S.). Strategic Studies Institute, 2010 At the end of the first decade of the 21st century the United
 States is involved in two ongoing wars faces a significant international terrorist threat and is witnessing an escalation of

international resistance to its leadership of the global world order Looking out to 2025 many see the potential for a prolonged period of instability as a result of competing economic models demographics the rise of new international actors and the resurgence old ones climate change and the scarcity of resources The range of stability challenges will stretch the capabilities of any military force structure and require innovative thinking on the part of policymakers and military professionals alike on the appropriate development and use of the military element of power In this anthology 16 students of the U S Army War College Class of 2008 offer their perspectives on the use of military power across the spectrum of conflict in the 21st century short of or following general war and provide insights into the necessary force structure policy strategy and doctrinal approaches for future success Beyond a focus on operations short of general war these writings share in common a worthwhile idea or set of ideas that can materially contribute to how the U S military can best conduct full spectrum operations Collectively these essays reveal the innovative thinking and diversity and depth of thought of the U S and foreign military and civilian agency personnel that comprise each student body at the U S Army War College as they prepare themselves to become senior leaders and fulfill their roles in their militaries or agencies This resource offers 16 students of the U S Army War College Class of 2008 perspectives and forecasts for the use of military power through year 2025 Scholars and policymakers alike may find these essays beneficial for long term strategy planning Related products Navies and Soft Power Historical Case Studies of Naval Power and the Nonuse of Military Force can be found here <https://bookstore.gpo.gov/products/sku/008/046/00290/8> Lessons Encountered Learning From the Long War can be found here <https://bookstore.gpo.gov/products/sku/008/029/00619/7> The Asia Pacific Century Challenges and Opportunities can be found here <https://bookstore.gpo.gov/products/sku/008/070/00868/8> Other products produced by the U S Army Strategic Studies Institute are available here <https://bookstore.gpo.gov/agency/1609>

preventive defense and its potentially profound consequences for the U S military The debates carried out within and about the QDR will shape the security policy of the United States well into the 21st Century In irons U.S. military might in the new century ,1995 This book is about the future condition of America s military might The message is sobering unsettling and for the moment unheeded Despite the best intentions of government U S fighting strength is being steadily and perceptibly eroded Unless the nation takes powerful remedial action or is very lucky before the end of this century this erosion in military power will lead to profound decline decay or worse Worse means that the debilitating form of in irons will become inevitable As will be shown the reasons for this accelerating and downward defense spiral are now predominantly structural domestic and embedded in the way the United States Government does and will do business in a world that possesses but a single superpower The larger questions of whether a dramatic cut in U S military capabilities and in the ability to project force on a timely and effective operational basis will matter and will harm U S national security are currently less precisely answerable However any message of warning is sure to be muffled and muzzled by measures of disinterest and complacency naturally arising from the public s attention on almost exclusively non defense issues and from the immediate and overwhelming superiority of today s U S military forces that seemingly contradicts any forecasts of despair *The American Decisions* John Proffatt,Abraham Clark Freeman,1887 *The Treaty Making Power of the United States* Charles Henry Butler,1902 **U.S. COMPILED STATUTES** United States,1923 **The United States is a nation.
