Anti-Submarine Warfare David Owen,2007-11-15 A deep dive into the tactics and technology used to defend against submarines from the opening of the First World War through World War II and beyond The submarine was undoubtedly the most potent purely naval weapon of the twentieth century In two world wars enemy underwater campaigns were very nearly successful in thwarting Allied hopes of victory indeed annihilation of Japanese shipping by US Navy submarines is an indicator of what might have been That the submarine was usually defeated is a hugely important story in naval history yet this is the first book to treat the subject as a whole in a readable and accessible manner It concerns individual heroism and devotion to duty but also ingenuity technical advances and originality of tactical thought What developed was an endless battle between forces above and below the surface where a successful innovation by one side eventually produces a countermeasure by the other in a lethal struggle for supremacy Development was not a straight line wrong ideas and assumptions led to defeat and disaster Iconography with dozens of photographs and often large format diagrams a vast bibliography and a complete and documented general approach make this volume a work of great quality and of great interest for all enthusiasts and scholars of this very interesting subject *Storia Militare* The modeller will not only find the text engaging but there is a superb collection of photographs and illustrations which of course include submarines corvettes and destroyers Subjects which the modeller increasingly appreciates Highly recommended *Model Boats The U-boat Wars, 1916-1945* John Terraine,1989 A definitive account of the development of submarine warfare during and between two world wars Examines U boat campaigns in World Wars I and II particularly the Battle of the Atlantic 1939 1945 **Summary of Capt. Donald MacIntyre's U-Boat Killer** Everest Media,2022-05-26T22:59:00Z Please note This is a companion version not the original book *Sample Book Insights* 1 I had been commissioned as Sub Lieutenant in 1926 and in 1939 I was enjoying foreign service leave after returning from a two year commission in command of the destroyer *Defender* on the China Station

I had spent the past thirteen years of service divided between destroyers and the Fleet Air Arm two branches of the Navy that were ideally suited to give me the training necessary for the role I was destined to play in the war 2 The years that followed in the Hermes on the China station and the Courageous at home were extremely enjoyable But I chafed at the lack of appreciation of what aircraft could do Gunnery was the naval officer s god and ex gunnery officers occupied most of the positions on the Flag List 3 The asdic is a device that sends out sound waves and picks up the same waves if they are reflected off an object and return to the receiver The transmitter receiver is immersed in water and the conical sound beam it sends out is broad and deep 4 The asdic was a device that could be used to search for submarines It worked by sweeping across a broad arc from one side of the ship s course to the other stopping every few degrees to transmit a ping and then listening for any echo coming back If an echo was received the sound beam was held on to it the range and bearing were read off and the course and speed of the target were passed to the plotting table **USS Frost** Warren J. Kerrigan,2001
