**Villa-Lobos and Modernism**

Ricardo Averbach, 2022-07-19 Villa Lobos and Modernism The

Apotheosis of Cannibal Music provides a new assessment of the Brazilian composer Heitor Villa Lobos in terms of his contributions to the Modernist Movement of the twentieth century In this profound study Ricardo Averbach elevates Cultural Cannibalism as a major manifestation of the Modernist aesthetics and Villa Lobos as its top exponent in the music field Villa Lobos s anthropophagic appetite for multiple opposing aesthetics enlightens through the juxtaposition of contradictory elements leaving a legacy of unmatched originality a glittering kaleidoscope of sounds that draw from the radical power of Josephine Baker to the outrageous extravagance of Carmen Miranda from Dada to Einstein s counterintuitive scientific findings from folklorism to atonality The constructed analyses use the works of Stravinsky as a familiar and popular touchstone for accessing Villa Lobos as the leading exponent of an aesthetic movement that has been neglected due to a traditional Eurocentric view of Modernism Averbach opens up new possibilities for the study of twentieth century music in general while unveiling how much our present aesthetics owes to the Modernist ideas introduced by the Brazilian composer

**Telepresence & Bio Art** Eduardo Kac, 2005 Eduardo Kac s work represents a turning point What it questions is our current attitudes to creativity taking that word in its most fundamental sense Edward Lucie Smith author of Visual Arts in the 20th Century His works introduce a vital new meaning into what had been known as the creative process while at the same time investing the notion of the artist inventor with an original social and ethical responsibility Frank Popper author of Origins and Development of Kinetic Art Kac s radical approach to the creation and presentation of the body as a wet host for artificial

memory and site specific work raises a variety of important questions that range from the status of memory in digital culture to the ethical dilemmas we are facing in the age of bioengineering and tracking technology Christiane Paul Whitney Museum of Art For nearly two decades Eduardo Kac has been at the cutting edge of media art first inventing early online artworks for the web and continuously developing new art forms that involve telecommunications and robotics as a new platform for art Interest in telepresence also known as telerobotics exploded in the 1990s and remains an important development in media art Since that time Kac has increasingly moved into the fields of biology and biotechnology Telepresence and Bio Art is the first book to document the evolution of bio art and the aesthetic development of Kac the creator of the artist s gene as well as the controversial glow in the dark genetically engineered rabbit Alba Kac covers a broad range of topics within media art including telecommunications media interactive systems and the Internet telematics and robotics and the contact between electronic art and biotechnology Addressing emerging and complex topics this book will be essential reading for anyone interested in contemporary art

**Music as Cultural Heritage and Novelty** Oana Andreica,2022-09-13 This book provides a multifaceted view on the relation between the old and the new in music between tradition and innovation This is a much debated issue generating various ideas and theories which rarely come to unanimous conclusions Therefore the book offers diverse perspectives on topics such as national identities narrative strategies the question of musical performance and musical meaning Alongside themes of general interest such as classical repertoire the music of well established composers and musical topics the chapters of the book also touch on specific but equally interesting subjects like Brazilian traditions Serbian and Romanian composers and the lullaby While the book is mostly addressed to researchers it can also be recommended to students in musicology ethnomusicology musical performance and musical semiotics

Heitor Villa-Lobos Eero Tarasti,1995 This fully revised new edition re-establishes Paul Griffiths s survey as the definitive study of music since the Second World War The disruptions of the war and the struggles of the ensuing peace were reflected in the music of the time in Pierre Boulez s radical reforming of compositional technique and in John Cage s move into zen music in Milton Babbitt s settling of the serial system and in Dmitry Shostakovich s unsettling symphonies in Karlheinz Stockhausen s development of electronic music and in Luigi Nono s pursuit of the universally human in Iannis Xenakis s view of music as sounding mathematics and in Luciano Berio s consideration of it as language The initiatives of these composers and their contemporaries opened prospects that have continued to unfold This constant expansion of musical thinking since 1945 has left us with no single history of music Paul Griffiths s study accordingly follows several different paths showing how and why they converge and diverge In addition to the composers mentioned above others whose music is discussed include Steve Reich Jean Barraque Elliott Carter Olivier Messiaen Gyorgy Kurtag Harrison Birtwistle and Gyorgy Ligeti Publication and recording details are given for the works of all these composers and many others
