Riley, 1980 This is the first book to deal with all aspects of the history of the viola from c 1500 to the present The development of the instrument the music especially written for it and the outstanding violists who played it are discussed and evaluated While doing research 1950 1957 at the University of Michigan for a doctoral dissertation entitled The Teaching of Bowed Instruments from 1511 to 1756 it became apparent to the author that the histories of the violin the cello and the double bass were well documented in many treatises There was however very little information available on the development of the viola In an attempt to fill this void the author immediately began to gather material on the viola In 1971 he made the first of four trips to England and Europe to continue research on this project This book therefore constitutes a report of information gathered from visits to museums libraries music archives the cities of Cremona and Brescia the shops of prominent luthiers and from interviews and correspondence with many of the leading violists and viola scholars of the 20th century Violists and luthiers will read with interest the history of the large tenor violas and the small alto violas covering the period from c 1500 to c 1800 At this latter time most of the tenors were

being cut down in size to make them easier to play Included in the book are photographs descriptions and dimensions of important violas from the shops of such masters as members of the Amati family Gasparo da Sal Paolo Maggini Andrea Guarneri Antonio Stradivari J B Guadagnini and others as well as material about the numerous 19th and 20th century craftsmen who attempted to improve the instrument The story of the viola s music is traced from c 1600 to the present and the reasons for its paucity during the 17th century are explained An account is given of the great surge of 18th century compositions which have recently been discovered and made available in modern editions For the teacher and the student this book chronicles the contributions of the earliest method books printed for the viola in the late 18th and early 19th centuries It records the influence of such great 20th century artist teachers as Hermann Ritter Maurice Vieux Vadim Borissovsky Lionel Tertis and William Primrose Performing violists will find not only the history of their instrument but also accounts of the contributions of such individuals as Karl and Anton Stamitz Chr tien Urhan the artist teachers mentioned above and of over 300 others whose names and biographies appear in the text and in an appendix to the book Dust jacket
