What Made The South Different:

Disturbing Calculations Melanie Benson Taylor, 2010-01-25 In Thomas Wolfe's *Look Homeward Angel* Margaret Leonard says "Never mind about algebra here. That's for poor folks. There's no need for algebra where two and two make five." Moments of mathematical reckoning like this pervade twentieth-century southern literature, says Melanie R. Benson. In fiction by a large, diverse group of authors including William Faulkner, Anita Loos, William Attaway, Dorothy Allison, and Lan Cao, Benson identifies a calculation-obsessed, anxiety-ridden discourse in which numbers are employed to determine social and racial hierarchies and establish individual worth and identity. This narcissistic fetish of number speaks to a tangle of desires and denials rooted in the history of the South: capitalism and colonialism. No one evades participation in these disturbing equations, says Benson, wherein longing for increase, accumulation, and superiority collides with repudiation of the means by which material wealth is attained. Writers from marginalized groups including African Americans, Native Americans, women, immigrants, and the poor have deeply internalized and co-opted methods and tropes of the master narrative, even as they have struggled to wield new voices unmarked by the discourse of the colonizer. Having nominally emerged from slavery's legacy, the South is now situated in the agonized space between free-market capitalism and social progressivism. Elite southerners work to distance themselves from capitalism's dehumanizing mechanisms, while the marginalized yearn to realize the uniquely American narrative of accumulation and ascent. The fetish of numbers emerges to signify the futility of both.

Moral Problems in American Life Karen Halttunen, Lewis Perry, 1998 This volume surveys the moral landscape of the American past from slavery to the Vietnam War. The 14 contributing historians illuminate this critical dimension of American history, showing how historical study contributes to present-day debates about values and the moral life. [The Making of America's Culture Regions](#) Richard L. Nostrand, 2018-01-19 This outstanding text provides students with the essential foundation in the historical geography of the United States. Distinguished scholar Richard L. Nostrand skillfully synthesizes decades of historical geography research in an engaging and thought-provoking overview. His regional geography framework emphasizes the three themes central to cultural geography: cultural ecology, cultural diffusion, and cultural landscape, to explain the formation and change of culture regions in the United States. He shows convincingly that regions are a valuable pedagogical device for developing students' understanding of place and context. **American Exceptionalism?** Rick Halpern, Jonathan Morris, 1997-08-12 The idea that American historical development is different from that of other nations is an old one, yet it shows no sign of losing its emotive power. Exceptionalism continues to excite, beguile, and frustrate students of the American past. The essays in this volume explore the ways in which the process of class formation in the United States can be said to be distinctive. Focusing upon the impact of liberal political thought, race, and immigration, and the role of the war-time state, they challenge particularist and nation-centred modes of explanation. Comparing American historical development with Italian, South African, and Australian examples, the essays reinvigorate a tired debate. **Murder, Honor,**

and Law Richard F. Hamm, 2003 Table of contents *Drawn with the Sword* James M. McPherson, 1996 An issue oriented discussion of the Civil War by one of the leading living historians on the subject Explores questions such as who freed the slaves and why the North won Concludes with a final essay What s the Matter with History God in South Africa Albert Nolan, 2024-02-01 This is a reprint of the 1988 publication which is now out of print The book was written while Albert Nolan was in hiding during the State of Emergency in South Africa This volume includes reviews of the book used with permission from the South African Grace and Truth journal from 1990 The author believes that in South Africa the practice of the struggle is the practice of faith and to show this he reviews the central themes of the Christian faith as found in the Old Testament and the preaching of Jesus the nature of sin and salvation and of God s action in the world He also faces the dilemma of Christians who can no longer support the apartheid state but are uncertain where the liberation struggle will lead Like his best selling *Jesus before Christianity* *God in South Africa* is a contextual theology a theology rooted in the painful conversion of a church to the cause of liberation It can be regarded the author says as a conversation between South African Christians but out of that conversation comes a challenge to Christians everywhere to discover the meaning of the gospel to find God in their situation This profound book written in the 1980s to guide those seeking to deploy the gospel message against the repressive and abhorrent South African apartheid regime continues to speak powerfully to all peoples in all times and in all places It continues to show how the gospels respond to the signs of the times anywhere that people are in crisis providing the tools to build a contextualised and local theology that can preach the good news of God s liberating power against all forms of injustice Albert Nolan *South Africa s Gustavo Gutierrez* revealed hope that God cares for and finds the poor and oppressed wherever they are For my own community the potential to construct a contextualised and local Ukrainian theology offers hope that the good news always challenges those who oppress and forever speaks liberation for those burdened by an unjust war and the despair found in its wake Varieties of Southern Religious Experiences Samuel S. Hill, 1988 Over the past twenty years there has been a dramatic increase in the number scope and quality of studies of religion in the American South This new work has been inspired and furthered by a growing acknowledgment of the importance of religious studies in general by the conviction that religion has always been basic to popular discourse in the South and by an awareness of the bearing of religion on the political economic and social spheres of life The authors represented in this collection are professors of religion sociology and history and are all part of a new wave of scholars with fresh orientations toward the study of southern religion The essays cover a wide variety of subjects ranging chronologically from John Boles s work on white black relations in antebellum biracial churches to William Martin s treatment of what he calls the electronic church of the 1980s the television audience congregations who follow evangelists such as Jerry Falwell and Pat Robertson The book encompasses a wide range of points of view socioeconomic classes and denominations In addition to C Eric Lincoln s essay on the history of the black church in America there are J Wayne Flynt s on the social gospel

among southern Protestants from 1890 to 1920 David Edwin Harrell s on plain folk religion in the South from 1835 to 1920 Randall M Miller s on southern Catholicism and Ralph E Luker s on the ideas of the Episcopal theologian William Porcher DuBose Wade Clark Roof shows how the unchurched in both the South and the rest of the nation reflect the general modernizing process and Richard L Rubenstein treats the relationship between slavery and the Holocaust in William Styron s Sophie s Choice Clarence C Gen writes on the sectional splits in the major denominations prior to the Civil War and in his introduction and conclusion to the collection Samuel S Hill places these ten essays clearly in the context of our current understanding of southern religion and suggests the ways in which this work breaks new ground and points to important new interpretations These essays reflect the central assumption that there has been a distinct South for a long time and they also reveal and examine the genuine diversity of that region s religious history The book is effective and engaging in its treatment of southern religion as an identifiable cultural entity as well as in its evocation of the rich diversity of the parts of that entity
