We Write What We Like Darryl Accone, Zithulele Cindi, Saths Cooper, Duncan Innes, Jonathan Jansen, 2007-11-01 A celebration of Steve Biko's legacy of freedom Steve Biko the founder of the Black Consciousness philosophy was killed in prison on 12 September 1977 Biko was only thirty years old but his ideas and political activities changed the course of South African history and helped hasten the end of apartheid The year 2007 saw the thirtieth anniversary of Biko's death To mark the occasion the then Minister of Science and Technology Dr Mosibudi Mangena commissioned Chris van Wyk to compile an anthology of essays as a tribute to the great South African son Among the contributors are Minister Mangena himself ex President Thabo Mbeki writer Darryl Accone journalists Lizeka Mda and Bokwe Mafuna academics Jonathan Jansen Mandla Seleoane and Saths Cooper a friend of Biko's and former president of Azapo We Write What We Like proudly echoes the title of Biko's seminal work I Write What I Like It is a gift to a new generation which enjoys freedom from one that was there when this freedom was being fought for And it celebrates the man whose legacy is the freedom to think and say and write what we like

The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In The Phenomenon of Life the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united
