## **Working In Urban Schools:**

Working in Urban Schools Tom Corcoran, Lisa J. Walker, J. Lynne White, 1988 This document on the working conditions of urban teachers reports data from a survey of 31 elementary middle and secondary schools in five urban school districts More than 400 interviews were conducted with teachers school administrators central office personnel district officials board members and union officials The observations interviews and analyses confirm that in most of these schools the working conditions of teachers are bleak and would not be tolerated in other professions Among the findings are the following 1 physical conditions are sub standard because of a lack of maintenance repair and space 2 safety is not a serious problem to teachers except in very depressed neighborhoods 3 teachers do not have even the basic resources needed let alone access to new technologies 4 teachers consider hiring more personnel to address the personal problems of students a higher priority than hiring more teachers to reduce class size 5 teachers generally understand the cultural gulf between them and their students but are unable to deal with what they consider aberrant student behavior 6 teachers perceive that they are losing control over what they teach primarily because of district wide testing policies although they are in control of how they teach and 7 teachers have little confidence in supervision staff development or central office leadership Characteristics of good working conditions are identified Tables illustrate the data Appendices compare these findings with those of other studies provide a list of about 100 references describe the methodology and compare school effects BJV **Urban Schools** Laura Lippman, 1996 Illuminates the condition of education in urban schools compared to schools in other locations Also explores differences between students from urban schools and students in other locations on a broad spectrum of student and school characteristics Contents education outcomes student achievement educational attainment economic outcomes student background characteristics and afterschool activities school experiences school resources and staff school programs and coursetaking student behavior Bibliography Over 100 charts and tables **The Urban Primary School** Meg Maguire, Tim Wooldridge, Simon Pratt-Adams, 2006-05-16 This book offers an in depth understanding of the unique challenges and contributions of urban primary schools The authors set urban education in the wider social context of structural disadvantage poverty oppression and exclusion and reassert some critical urban educational concerns Recognising that practice needs to be informed by theory they provide a strong theoretical framework alongside contemporary ethnographic data Drawing on their extensive experience in urban primary schools as well as numerous case studies the authors present a fresh and stimulating view of urban primary schools which will inspire education professionals and academics alike The Urban Primary School is essential reading for teachers and trainee teachers in urban primary schools as well as for students of education policy makers parents and school governors The Rise and Fall of an Urban School System Jeffrey Mirel, 1999 The updated edition of the difficulties faced by the Detroit public schools and the historical reasons that led to the present situation *School Counseling for Black Male Student Success in 21st Century Urban Schools* Malik S.
